

NEW

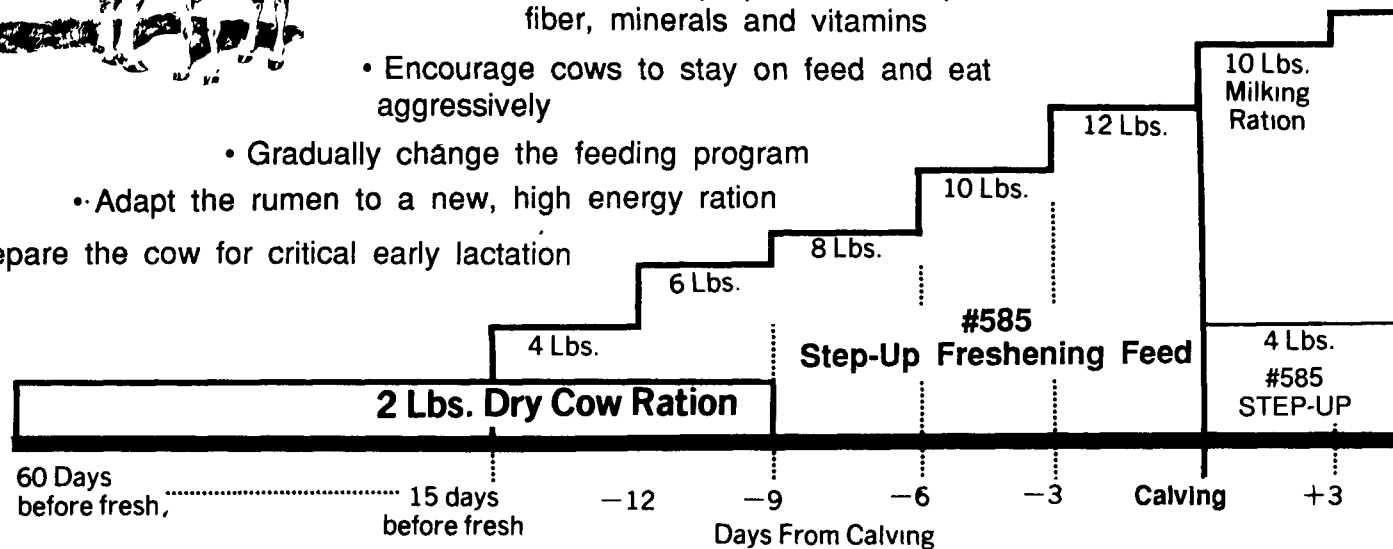

#585 STEP-UP FRESHENING FEED

**Pennfield Has Created A New Feed To Accurately
And Conveniently Fit Into The Feeding And
Management Of The Freshening Dairy Cow...**

GOALS

- Reduce stress, minimize health problems before and after freshening
- Provide the proper levels of protein, energy, fiber, minerals and vitamins
- Encourage cows to stay on feed and eat aggressively
- Gradually change the feeding program
- Adapt the rumen to a new, high energy ration
- Prepare the cow for critical early lactation

Whenever possible, a gradual increase in feeding rates is recommended. Follow the feed rates above.

FEATURES & BENEFITS

FEATURES

12% Protein level

Gradually degraded fiber from multiple sources

Controlled Phosphorus & Calcium level

Concentrated Trace Minerals

NEW, higher Selenium & Vitamin E amounts

Added Niacin

Added B Vitamins & Electrolytes

Optimum Vitamin A & D levels

Added Buffers

Available Zinc from Zinpro (Zinc Methionine)

Flaked Grains & Molasses

Protein/Mineral/Vitamins Pelleted Together

BENEFITS

Provides needed protein without becoming excessive on haylage diets

Provides energy while reducing acidosis

Meets needs and avoids excess calcium & milk fever

Higher levels of important trace minerals ensure proper supply

NEW, higher maximum Selenium and recommended Vitamin E levels enhance immune system to fight stress (reduce retained placenta and mastitis)

Amount added has been shown to reduce incidence of subclinical ketosis and keep cows on feed

Help cattle cope with stresses of feeding program changes and calving

Maintains healthy body tissues to optimize reproduction, minimize mastitis, improve calcium usage

Help the transition to the milking ration, reduce acidosis and keep cows on feed

Active stress fighter reduces foot problems, mastitis and aids immune response

Improves palatability, encourages cow to keep eating

Prevents separation and assure cows get uniform amounts of important ingredients
