## SLICK CONCRETE CAN BE ROUGHENED

SCABBLING is an effective way to avoid unnecessary losses of cattle. The SCABBLER makes bands about two inches wide approximately 1/8" to 3/16 in. depth. This gives sufficient area for good footing while allowing you to scrape the smooth surface as before. It is near enough to the surface to give your cows full advantage of the roughness and deep enough to remain effective for years. It greatly aids in heat detection.

And the good news is that it is reasonably priced. You have the choice of doing it yourself or having us do it for you. We offer service right to your door. Call us for more details.

### You need a truck body and hoist that work as hard as you.

Your favorite truck dealer and the local Omaha Standard distributor can help with the work. Omaha Standard's name on a truck body plus hoist means good looking, rugged equipment that doesn't wear out. You'll need to replace the truck before you'll need to replace the Omaha Standard body or hoist. That's quality working for you, year after year. When it's time to purchase a combination grain and livestock body, a stakeless steel grain body, all aluminum grain body, a scissor or stabilized Olympic telescopic hoist, Omaha Standard has the right equipment for the job, the load and the road. It's a fact — your Omaha Standard distributor is the single source for truck bodies and hoists.
