

# DESIGNED FOR TOTAL PERFORMANCE

## Designed for total performance

**S**tep up to better performance with the Model 900 forage harvester. The 12 knives of the 21-inch diameter cutterhead deliver uniformly-cut, high-quality forage. Here are just some of the features available that make the "900" a harvester designed for total performance:

- Metalert® II electronic metal detector—protects cutterhead and your valuable animals.
- Electromagnetic clutches—give instant response in controlling feedroll and attachment drives.
- Easy-adjust shearbar—makes adjustment fast and precise.
- Two-speed blower—is energy efficient.
- Hydraulic swing tongue—makes mounting attachments fast and easy.

## The New Model 790 with five-year cutterhead protection

**W**hen it's time to chop, you want a harvester that keeps on going. And that's what you get with the new Model 790 forage harvester with optional Metalert® II electronic metal detector. Because the Metalert II system works so well, you get a five-year guarantee against cutterhead "blow-ups" caused by ferrous metals. Metalert II looks for trouble before it happens. You avoid costly repairs... downtime... and keep nasty bits of chopped metal out of your livestock feed. The new Model 790 is available with either 540-rpm or 1000-rpm drive. And, the massive 12-knife cutterhead has single-edged hardened alloy knives with tungsten surfaces. Stop in and take a look at the new Model 790 today.

## YOUR FARM EQUIPMENT SPECIALISTS

## Exclusive - 12-knife cutterhead

**H**igh-quality feed is important to you. So you'll like the fine, uniform chop you get from the Model 718 forage harvester. It's the only medium-duty chopper available with a 12-knife cutterhead to give you a controlled, even cut. The uniform length-of-cut makes for easier unloading, blowing, storing and feeding. And you can choose from four crop-saving heads—a one- or two-row cornhead, a windrow pickup or a sicklebar.

No wonder the "718" is the best-selling medium-duty forage harvester in the country.
