Buying Bedding

Most of us will spend one-third of our lives in bed, so the bedding we choose should be right for us and right for sleeping, says Maryetta Dorricott, Delaware County Cooperative Extension home economist.

On the other hand, although bedding is important, some advice about it has over-emphasized its role in our lives to the point where some of us find shopping for bedding the most difficult furniture shopping we do.

When should you replace the bedding you already own? Here

are some ways to know if you need bedding.

•A lumpy, bumpy mattress is not a good one; a squeaking mattress indicates that the mattress is not supporting you properly.

•If, when you are sleeping in another bed, you find the mattress a good deal more comfortable than the one you have at home, you need a new mattress.

•Finally, don't concentrate only on your own bedding and ignore other beds in your home. Good hosts and hostesses sleep on guest room beds at least once a year as a test.

FORD TRACTORS & NEW HOLLAND SKID LOADERS

Reach For The Sky!

New Holland "Super Boom" loaders lift the payload forward as the boom rises. So you get more forward dump reach where you need it most. Extra dump reach means you can load the center of a tandem-axle dump truck.

Super Boom loaders also feature a longer wheelbase for increased stability and fast cycle times for more productivity.

Models range from 28.5 to 75 horsepower with SAE load rating up to 2,050 pounds.

Ask us for a demonstration. You'll see how much better a skid-steer loader can be.
