Before You Buy A Combine

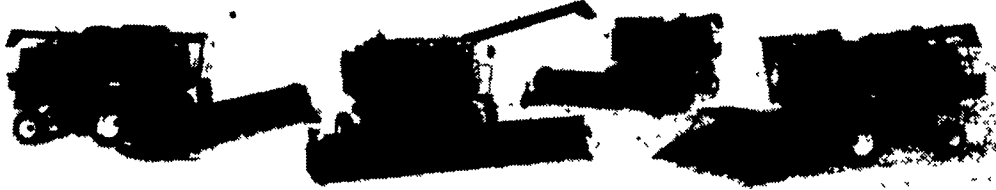

**IF YOU WANT MORE FROM YOUR
CROP...CASE INTERNATIONAL
IS THE ANSWER**

Axial-Flow has always been a clean, simple, efficient system. Now, with the 1600's increased threshing and separating area, it does an even more complete job.

The Axial-Flow system threshes grain several times (not just once) as it moves rearward, spiraling gently around and around the single rotor. Instead of a troublesome system of straw walkers, Axial-Flow uses simple separating grates and the power of centrifugal force.

Threshing and separating are accomplished in one highly efficient operation within the rotor and cage. You'll save a lot of grain that conventional combines miss. And it'll be cleaner grain because Axial-Flow takes the time to be gentle and thorough.

THERE IS AN AXIAL-FLOW FOR YOU

**CASE... THE "CAN DO"
MACHINE**

*"I can do the work of 10 men with anyone of
my five 1845 Case Unloaders," says one
happy customer. "You really can't believe
it 'til you put one to work!"*

The line of Case skid steers include three models to meet your workload requirements. The 1816C, with a 16 net horsepower (11.9 kW) gasoline engine and a width of only 35 inches (889 mm) is a proven performer for tight-quarter work. The 1835B gives you a choice of a Case water-cooled 32 net horsepower (23.9 kW) gasoline engine or 34 net horsepower (25.4 kW) diesel engine. The top-of-the-line 1845C Uni-Loader skid steer features a Case 51 net horsepower (38 kW) diesel with the power to cut big jobs down to size.

Maneuverability, dependability and serviceability all add up to better performance and a better bottom line. For more facts and convenient one-stop service see your Case IH dealer.
