Before You Buy A Combine

IF YOU WANT MORE FROM YOUR CROP...

CASE INTERNATIONAL IS THE ANSWER

Axial-Flow has always been a clean, simple, efficient system. Now, with the 1600's increased threshing and separating area, it does an even more complete job.

The Axial-Flow system threshes grain several times (not just once) as it moves rearward, spiraling gently around and around the single rotor. Instead of a troublesome system of straw walkers, Axial-Flow uses simple separating grates and the power of centrifugal force.

Threshing and separating are accomplished in one highly efficient operation within the rotor and cage. You'll save a lot of grain that conventional combines miss. And it'll be cleaner grain because Axial-Flow takes the time to be gentle and thorough.

THERE IS AN AXIAL-FLOW FOR YOU

CASE... THE "CAN DO" MACHINE

"I can do the work of 10 men with anyone of my five 1845 Case Unloaders," says one happy customer. "You really can't believe it 'til you put one to work!"

The line of Case skid steers include three models to meet your workload requirements. The 1816C, with a 16 net horsepower (11.9 kW) gasoline engine and a width of only 35 inches (889 mm) is a proven performer for tight-quarter work. The 1835B gives you a choice of a Case water-cooled 32 net horsepower (23.9 kW) gasoline engine or 34 net horsepower (25.4 kW) diesel engine. The top-of-the-line 1845C Uni-Loader skid steer features a Case 51 net horsepower (38 kW) diesel with the power to cut big jobs down to size.

Maneuverability, dependability and serviceability all add up to better performance and a better bottom line. For more facts and convenient one-stop service see your Case IH dealer.
