

New Jersey Holstein Assn. Sets Barn Meetings

The New Jersey Holstein-Friesian Association, in cooperation with the Holstien Friesian Association of America, will sponsor a series of barn meetings in early September.

To be held on four consecutive evenings at various locations throughout the state, the programs will feature a classification demonstration and an update on the classification "Data Logger" as well as an exhibition of the equipment itself.

In addition to the classification

program, a presentation on HolsteinMate will be given by Kathy Lee, Manager of Animal Breeding Services at HFFA. The Holstein-Mate program, new from HFAA, is a computerized sire selection program featuring simplicity and flexibility, and yet is comprehensive enough to meet the needs of all breeders.

The programs are free and open to any and all interested persons. All programs begin at 8:00 PM. Dates and places are as follows:

September 8, William Terhune - Belvidere, Classifier, Clarence Corman; September 9, William Teets - Cokesbury, Classifier, Paul Miller; September 10, William Pettit, Jr. - Vincentown, Classifier, Patsy Gifford; September 11, Dale Peterson - Alloway, Classifier, Bob Murphy.

Visitors may view the host herds before and after the programs. For additional information contact Breed Improvement Chairman Joseph Valen at (609) 896-1237.

Siegel Named Fellow Of Poultry Science Assn.

UNIVERSITY PARK — Herbert S. Siegel, professor and head of Penn State's Poultry Science Department, was named a fellow of the Poultry Science Association of America.

He was honored at the association's annual meeting, held recently at Oregon State University.

The Poultry Science Association of America is made up of more than 2,000 members from across the United States and Canada, and includes many international scientists, educators and poultry industry members.

Cut Costs, Not Corners.

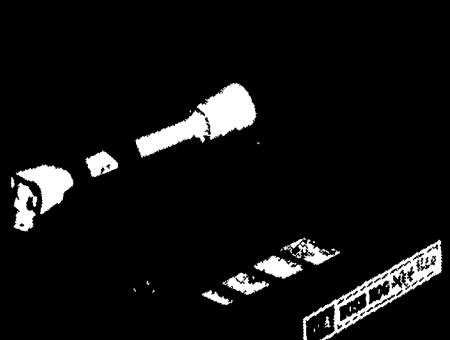

With the Bush Hog Squealer. It's a Bush Hog rotary cutter at a smaller price. But don't let the price fool you. The Squealer's engineered with the same quality features that are making

Bush Hog the biggest name in farm implements. The gearbox is Bush Hog-designed and Bush Hog-patented. The cutter blade tips move faster than other

economy cutter's, for more efficient cutting. The optional elliptical blade pan on the 36" and 42" wide models and the standard

elliptical blade pan on the 48", 60" and 72" wide models are similar in design to the blade pans used on larger Bush Hog cutters (only scaled down a little, to each of the Squealer's five sizes). So while the Squealer may be inexpensive it's no toy. It's tough. It's efficient. Because like all 100 Bush Hog implements, including the 20 new models

we've introduced in the last 12 months, it's engineered to cut what needs cutting most in farming these days. Costs
