THE DAIRYMAN'S CHOICE...

DE LAVAL The New DeLaval FEED CAR Stanchion Feeder

NOW... All the advantages of automatic individually controlled feeding is available for stanchion and tie-stall barns.

The principle of feeding little and often is now available and affordable. Now 30-40 cow operators can have the same benefits as large operators. You can give each cow an individually programmed ration based on milk production, stage of lactation and other factors you want to consider, feed small amounts up to 10 times every 24 hours. It's accurate and automatic, feeds 4-to-5 cows per minute with one or two types of feed; and has optional automatic refill. Travels around your barn on an overhead monorail. Owners report it can pay for itself in 18 months or less!

Ask Your Dealer For More Information

DELATRON I PULSATOR

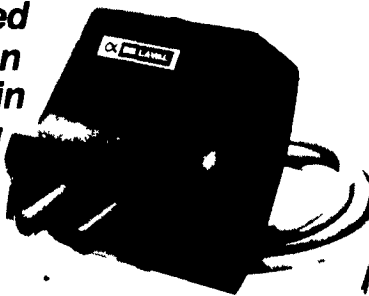

The Delatron I Pulsator features
