

Reta Wins State Championship

(Continued from Page D14)

to the Reta cow. Judge B.J. Powell, Pennville, Indiana, favored the five-year-old class with both champions. Justin, along with his father Edward Doeberiener, showed a number of first-place entries that included the first place

produce of dam, first place three year old and the first place senior two year old that was grand champion at the Central Regional Show. The Doeberieners' Queens Manor Holsteins received the premier exhibitor banner.

The reserve grand champion-

ship of the junior division was Metcalfs Valiant Beauty-ET showing dry for Thomas McCauley of Elizabethtown. A milky-looking threesome took the first place best three females class for Gor-Wood-D Acres of Gordon Wood and family, Mansfield.

These winners launched Gor-Wood-D Acres Farm to the premier breeder award.

Ebe-Tide Ibido Poppy was the first place aged cow and Ebe-Tide Mona Maria was the first place 100,000 pound cow for Morrell Farms, Cochradon. Poppy was also named best animal bred by the

exhibitor.

In the 1987 Keystone Futurity Class, Sunny Bend Sexy Icicle B Star took home the first prize of \$400 for Bridgette Boyer. Eight entries in this class split the money that had been fed into a kitty since the entries were calves.

(Turn to Page D16)

Pull through the tough spots with a White Farm 4WD.

When wet spots or other tough areas slow you down, a quick shift into four-wheel drive can make all the difference. And all it takes is a Power Front Axle option on your 2-135, 2-155 or 2-180 Field Boss® tractor.

4WD is not created equal. If you think all Power Front Axles are the same, look again. Most tractors use the engine as part of the structural frame. Adding four-wheel drive puts a lot of stress on the engine block. We think too much stress.

It's one reason why every Field Boss has a separate main frame casting. The engine is cradled inside it. Besides adding hundreds of pounds in working weight to the tractor, this separate main frame handles the extra stress of the four-wheel drive

Experience for yourself the quality and value built into our Power Front Axle. Proven with 24 years of on farm use.

A separate heavy cast main frame teamed with full mechanical drive makes our Power Front Axle one of the most dependable anywhere

Meet the most fuel-efficient tractor in its class!

The 110.5 hp.* 2-110 Field Boss® tractor teams power, convenience and comfort with the best fuel economy in its class. That's a tough combination to beat!

Record setting efficiency. High performance three-ring pistons, unique intake and exhaust porting and an aspirator-type pre-cleaner improve engine burning and air flow. Part of the reason the 2-110 set new fuel economy records!

Convenience and comfort. Our standard 3x6 Over/Under powershift transmission lets you shift on-the-go through three ranges in each of six forward gears. All shift and hydraulic levers are conveniently located on the right hand console

Come in today and experience for yourself the quality and value built into every 2-110 Field Boss. You'll like what you see.

The 2-110 Field Boss® tractor features our Over/Under powershift transmission with nine field speeds between 2 and 7 mph.

Feel The Quality. Experience The Value.

Let us show you the difference in disks.

Extra strong gang bolts, better bearings and a large selection all help set White Farm disks apart from the competition.

Solid construction. Sturdy gang bolts prevent bending. And White Farm bearings and bearing housings are made to hold-up under high speeds, heavy residue and rough terrain.

More weight means better disking. There are ways to spot built-in working weight without putting the

implement on a scale. One example is massive box beams of high carbon steel used in all of our disks. More steel means more durability, plus adds weight to keep disks in the ground.

Models for every need. We've got a disk for your farm. Offset, rigid and flexible-tandem disks, many with flat folding features. With blade spacings available in 7-, 9- and 11-inches

Come in and experience for yourself the quality and value built into every White Farm disk.

You can see our built-in working weight in the massive main frame box beams of this 273 disk

A more valuable disk chisel.

All disk chisels can save topsoil. But White Farm's 435 Conservation Chisel Plow also saves time and money.

Versatile concave disks up-front. Individually mounted 22 inch blades are hydraulically controlled to let you determine the amount of residue that remains on the surface. Disks can be raised completely out of the

ground for maximum conservation, or lowered for maximum tillage.

Big 4" x 6" frames. Our steel box beams have 25 percent more weld area at every joint than competitors' 4" x 4" beams.

Chisel shanks every twelve inches. Three ranks of chisels spaced twelve inches apart on a long 90 inch frame help maintain uniform tillage and prevent residue build up. The 2" x 29" spring-loaded chisels raise up and over obstacles - up to 11 inches.

Come in and experience for yourself the quality and value built into every 435 Conservation Chisel Plow.

Over 100 years of experience has helped White Farm design what we believe is the most versatile, durable conservation chisel plow today.
