QUALITY USED PARTS

We are continually increasing our inventory of late model tractor parts. We have a good selection of quality used parts at competitive prices.

ATTENTION!
International Harvester Owners
Tighten worn steering arms on 56-66-86 series IH tractors without welding, spitting, or bolting.
A taper is machined into the new steering arms. A sleeve is then broached to match the original splines of the spindle. The outside of the sleeve is tapered to match the inside taper of the arm. These two, finely-machined surfaces then meet for a neat, permanent, surelock fit. A key is installed for added strength and safety.
