

These rugged coulters are designed for mounting on individual planter units.

## Yetter Introduces Heavy-Duty Coulters

COLCHESTER, II. — These rugged attachments are designed for mounting on individual planter units of Yetter row units, JD 7000 and 7100, New Idea and Kinze planters. They are mounted in such a way that the entire assembly - coulters and planter - operate as one efficient unit. The rigid steel coulters are fully adjustable for blade wear so the coulters always cut to

uniform depth ahead of the seed drop for precise planting.

Heavy-duty down pressure springs provide extra penetration in hard soils and prevent bouncing on rough ground. The 16" bubble fluted coulters slash through clods and heavy trash to provide minimum tillage with maximum, uniform seed placement.

## Chore-Time Cage Offers Watering Cup

MILFORD, IN. — Chore-Time Cage Systems has released a new cage cup watering system. "The Chore-Time Swish Watering is a simplified system. It has no spring to wear out and has less than half the parts of some of the competition," said Bob Krevinghaus, product manager at Chore-Time.

The Chore-Time Swish System provides more usable watering space per cup because of the large round cup design, added Krevinghaus. The cup also is self cleaning. When a bird triggers the valve a "swishing" action floats feed particles, causing them to be consumed, thus a cleaner cup results. With this self-cleaning cup and fresh water with each triggering, the birds will consume more fresh water.

The system is flexible because of the use of the bird-proof plastic water connection hose. This hole allows for quick and easy cup replacement and allows for the main water supply line to be placed in different locations. The cup can be mounted in any style of cage and toward the front or back of most cages. The Cage Layer System offers an exclusive three-point locking system to insure rigid cup mounting. The Brood Grow System has an adjustable cup which can slide up and down easily on a plastic track. This allows cup height to be easily adjusted as birds grow. The plastic track installs in a slit in the cage.

Chore-Time Cage Systems and Chore-Time Equipment offer a full line of poultry and livestock

# White-New Idea Presents Mid-Range Heavy-Duty Tractor

COLDWATER, Oh. — A new heavy-duty, row-crop tractor in the mid-range horsepower category, the White 140 rated at 137 pto horsepower at 2200 rpm, was recently introduced by White-New Idea Farm Equipment Company at their corporate headquarters in Coldwater, Ohio. This new heavy weight features a six-cylinder, 359 C.I.D. Cummins "B" diesel engine delivering 26% torque rise and near "Constant Power" with fuel efficiency "as fuel efficient as the best engine available today". Turbocharging and aftercooling were major factors in achieving the unique combination of lean fuel consumption and strong lugging power.

A refined 3x6 Over/Under Powershift transmission, with 3 power shift speeds, in each of 6 ranges, provides 18 forward and 6 reverse speeds. This broad choice of travel speeds enables the operator to match power to the job for optimum efficiency. The Powershift transmission coupled to the 20 percent torque rise of the engine provides a speed range of 40 percent in each gear of the constant mesh transmission without loss of power over the entire speed range. Power hydraulic differential lock, inboard planetary final drives, and heavy 3 3/8-inch axle shafts are also standard. A 540/1000 rpm independent pto is hydraulically actuated through a reliable wet, multi-disc clutch.

A 22 gpm charged, closed-center hydraulic system provides 2250 psi of constant pressure to operate the category III-II three point hitch and new combination float/detent remote valves.

A heavy-duty PosiTrac Full Power Front Axle provides the shortest turning radius of any tractor in the 130-150 horsepower range while also boasting a near 2

The White 140 row-crop tractor is rated at 137 pto horsepower at 2200 rpm. It has a six-cylinder, 359 C.I.D. Cummins "B" diesel engine.

feet of crop clearance at the axle housing. The exclusive cast iron front mainframe not only gives the PosiTrac axle support, but provides the weight to properly harness the power of the front axle.

The modular cab features a new Field Facts computer with bar graph display of engine rpm, as well as, digital display of: ground speed, engine rpm, pto rpm, hours of use, and area covered. The optional radar unit yields true

ground speed, percent wheels lip, and true area covered. Another significant option is the new Aero-Form seat which is an air-ride suspension design with its own self-contained air supply.

The White 140 is one of 5 new White tractor models recently introduced by White-New Idea Farm Equipment Company. In addition to the White 140, the White 100, 120, 160 and 185 are also available.

## Bull Named President Of Dealers Association

HARRISBURG — Dennis M. Bull was elected president of the Penn-Jersey Farm and Power Equipment Dealers Association at their management conference recently at Seven Springs, Pennsylvania.

Bull is president of Bull International, Inc., of Washington, Pennsylvania. He has a full-line contract representing Case-International, Yanmar, New Holland and Cub Cadet farm and outdoor power equipment. He has served as a director of Region III for several years and has been elected to vice president previously.

After graduating from West Virginia University with a degree in agriculture, Mr. Bull went to work for International Harvester Company where he spent nine years as a zone manager. In 1967, he pur-

chased Somerville Equipment Company, of Washington, Pennsylvania.

Bull served in the Korean Conflict in 1951 and is past president of the Washington Lions Club and past master of Masonic Lodge 623. He is a member of the Scottish Rite and Syria Temple, and serves on committees of First United Methodist Church and Washington-Greene County Blind Association. He and his wife, Betty, have three children: Denise, of Columbus, Ohio, and Jeff and John, both of Washington, PA.

Mr. Bull will represent over 500 farm equipment dealer members throughout Pennsylvania and New Jersey during his year long duties.

The association has represented farm equipment dealers since 1913. The state offices are located in Harrisburg, Pennsylvania.

## Seedway To Operate As Wholly Owned Subsidiary

equipment.

For more information contact Chore-Time Equipment, P.O. Box 2000 State Road 15 North, Milford, Indiana, 46542-2000 or phone 219/658-4101.

SYRACUSE, NY—The Agway board of directors has approved an investment in Seedway Inc. of Hall, NY, to be operated with its present management and dealer system in place as a wholly-owned subsidiary of Agway.

Seedway was formed 25 years ago by Carl Fribolin. Sales volume has grown to approximately \$11 million annually. Product lines include seed for corn, forages, soybeans, small grains, and selected vegetables.

Phil Ashcraft, Agway vice president and director of Crop Services, reports that Seedway has an outstanding reputation of quality products and excellent customer service.

Seedway will continue to market only through its strong independent dealer system which offers an excellent distribution channel to grow in the seed business, according to Ashcraft.

Seedway's primary distribution is in New England, New York, Pennsylvania, New Jersey, Delaware, and Maryland. Brand names

include Eastland/Todd and Seedway, as well as exclusive distribution rights for Asgrow and O's Gold crop seed and Bejo commercial vegetable seed product lines.

"We expect Seedway to continue its long history of growth

through its strong dealer network," according to Ashcraft. He emphasized that Seedway will continue to operate with its current management team with Don Wertman as general manager and CEO. Carl Fribolin will remain as a consultant.

## Atlantic Local Elects Officers

SOUTHAMPTON — The locals of Atlantic Dairy Cooperative District 10 elected their respective officers at the district's annual meeting Oct. 13.

The new officers of the Rising Sun Local are Alfred Haines, president; Sam Orr, vice president; and Mildred C. Ayers, secretary/treasurer. All three officers are from Rising Sun, Md.

Alfred Crothers, also of Rising Sun, was named delegate to attend the cooperative's annual meeting in November. Ayers was named alternate delegate.

The Bayview-Cecilton Local elected Robert Miller, Northeast, Md., president. Ronald Under-

wood, also of Northeast, was elected vice president, and James V. Yale Jr., Rising Sun, Md. was named secretary/treasurer.

The local's annual meeting delegate is William F. Schrader, Earville, Md. President Robert Miller was named alternate delegate.

During its election, the Elkton-Providence local named the following officers: Carl Stafford, president; Charles S. Moore, vice president; and Wayne Stafford, secretary/treasurer. The three officers reside in Northeast, Md.

Moore was also appointed delegate to the cooperative's annual meeting. Wayne Stafford is alternate delegate.

This watering system has more watering space per cup and has a self-cleaning mechanism.
