## FERMENTABLE FIBER

### Is Critical To Development Of Super-Energy 'MAXI-TECH 32 F.F.'

Dairymen know a higher level of energy maintains higher milk production. However, proper forage intake is critical, therefore the amount of grain must be limited. Use of high energy fat (250% more energy than grain) has been limited by the fat-fiber reaction in the rumen. Therefore, **Dairy Cows Limiting Factor Continues To Be Energy.**

**MAXI-TECH 32 F.F. works in four new ways to  
Increase Your Cows Energy Digestion:**

- 1. Purina Mills Technology Made It Possible to Create An Extreme Density Of Super-Energy Animal Fat In Maxi-Tech 32 F.F.**
- 2. Maxi-Tech 32 F.F. Has Twice the Fiber Found in Average Supplements. This Fiber Allows More Fat To Be Consumed Without Creating A Fat-Fiber Imbalance.**
- 3. Fermentable Fiber Is Digestible, So The F.F. Component Of The Maxi-Tech 32 F.F. Is Converted Into More Additional Energy.**
- 4. Fermentable Fiber Also Creates A More Favorable Environment For Essential Rumen Bacteria, Therefore The Entire Diet (Not Just The Maxi-Tech 32 F.F.) Is Utilized More Efficiently!**

*If You Are Looking For.....A High Performance Diet*
