Jersey Genetic Recovery: Your Tool For Improvement

FEBRUARY, 1988: Do you have any unregistered, purebred Jerseys? If so, there is a program designed to help you upgrade your herd and improve your dairy operation.

Since 1975, Jersey dairymen across the country have been using the Genetic Recovery Program to identify and record their unregistered, purebred Jerseys. Over 95,000 Registered Jerseys have resulted.

Genetic Recovery Jerseys have topped sales across the country, won top honors at major shows, made outstanding production records and produced young sires that have been samples by major AI bull studs.

The program is as easy as 1, 2, 3! Your unregistered Jersey cow sired by an unknown bull or by a grade Jersey bull will become the

Original Animal and carry the OA prefix on her name. A dead cow that was sired by a Registered Jersey bull but who has living daughters in the herd can also be an OA. The OA fee is \$5.00.

In step 2, the daughter of an OA sired by a Registered Jersey bull is eligible for the Provisional Register and will carry the PR prefix on her name. The PR fee is \$7.00.

If the PR cow meets certain production and type qualifications, her daughters are eligible for step 3, Genetic Recovery, and will carry the GR prefix. Cows with the GR prefix are fully registered. The GR fee is the minimum for registered Jerseys.

For complete information, proper forms and FREE assistance, write or call: The American Jersey Cattle Club, P.O. Box 27310, Columbus, OH 43227-0310, (614) 861-3636.

At Last! A Reliable, New Stainless Steel AG-CHEM FOAM MARKER

Each Foam Marker Contains: **\$725.00**

- Mixing chamber for each boom.
- Drop hoses for each boom.
- Electric harness for in-cab controls (on-off/left-right).
- Hose for boom lengths up to 47'.
- 8 oz. container of new 80-to-1 Ag Foam.

The Ag-Chem foam marker offers you efficient operation with a 12 volt compressor that draws only 9 amps. Independent left and right boom markers can be controlled from the cab for on-the-go operation. That lets you operate either boom marker for precise, economical foam placement. And best of all the Ag-Chem Foam Marker produces a dense foam within seconds of agitation, and has a dependable output that can be adjusted for volume.

Use with the new 80-to-1™ high concentrate foam.
