The STI-P3 tanks bear Underwriters' Underground Label, STI-P3 Label, 30-year limited warranty. The STI-P3 tanks are equipped with sacrificial galvanic anodes, urethane paint and dielectric bushings. The STI-P3 are equipped with the Protection Prover II (to monitor anode voltage).

LENTILS A SUBSTITUTE FOR MEAT **DURING LENT**

If you're looking for a nutritious substitute for meat during Lent, try lentils. Combined with a grain, they are a good source of protein for anyone who is not eating meat.

Proteins are made up of amino acids. There are 21 amino acids, but eight of them are essential, meaning our bodies cannot manufacture them from other sources.

Meats have all of the essential amino acids. Other foods, such as cereals, breads, beans, peas and lentils, are incomplete proteins since they only have some of the essential amino acids.

But, these foods can be put together like a jigsaw puzzle to give you all the amino acids you need to make a complete protein. These foods, when put together, are called complementary proteins.

Lentils and rice or whole wheat make a delicious complementary protein that can be substituted for meat if you're looking for something different to eat during Lent.

For something unusual, try a spaghetti sauce made from lentils and served over whole wheat spaghetti.

Lentil Spaghetti

- Sauce
- 2 tablespoons oil 3 small onions, chopped
- 3 cloves garlic, minced
- 3 cups tomato sauce
- 6 cups water
- 1-1/2 cups lentils
- 1-1/2 teaspoons salt
- 1-1/2 teaspoons oregano
- 1-1/2 teaspoons thyme
- 3 teaspoons basil
- ¹/₄ teaspoon tobasco sauce
- Spaghetti
- Grated cheese, if desired

Have You Heard?

By Doris Thomas Lancaster Extension **Home Economist**

In oil, saute onions and garlic. Add other ingredients. Cover and simmer 45 minutes. Serve over spaghetti. Top with grated cheese, if desired. Serves 6.

MAKE THE MOST OF YOUR AUTOMATIC DISHWASHER

Your automatic dishwasher brings you a welcome release from one of the most disliked jobs in the kitchen. It will serve you faithfully any time of the day or night at a cost of only pennies a load. All it asks is understanding, care and proper feeding of detergents specifically designed for its digestion.

Like all modern automatic appliances, it has been scientifically engineered to perform in a certain way. Be sure to follow the manufacturer's suggestions.

Preparation- Scrape dishes to remove large food particles or rinse quickly under running water. Remember your machine is not a garbage disposal.

Place cups and glasses open end down; the inside surface should face toward the spray of water. Place silverware in the silverware basket. Do not crowd silverware.

Use only a detergent especially made for automatic dishwashing. Fill the detergent cup or cups according to manufacturer's directions. Never sprinkle detergent directly on any item. Do not use soap powders, liquid or laundry detergents. They create suds which block the washing action. They may cause the dishwasher to overflow and damage the motor or your floors. They also have a scum which rinsing cannot remove.

Water Temperature- For maximum efficiency, your machine should have a water temperature of 140-160 degrees. Set your hot water heater at 160 degrees F.

LOW PRICE PROTECTION POLICY:

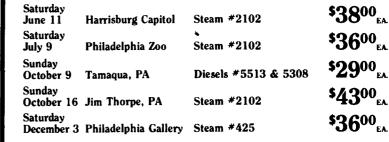

Within 30 days of purchase if someone advertises or offers at a lower price the same tank you have already purchased from us, let us know, because we'll pay you the difference!

An Additional 1% DISCOUNT is offered if paid by Cash Money or Certified Check
