# Reel Auggie

**NEW**

**A new concept in TMR Mixers**

### Reel Auggie Mixing Chamber

The reel turns slowly and gently lifts material into the two blending augers. The lower auger is notched and moves the material forward. The upper auger, which moves the material rearward, features replaceable knives which assist the blending of long baled hay or other tough roughage materials.

Two of the reel cross bars feature plastic wipers which assist in blending the finest ingredients as well as assuring efficient clean-out when unloading.

The reel cross bars are spring loaded to minimize binding or wedging and to keep power requirements low.

### Knight 2000 Series Reel Auggie

The Mixer/Blender/Feeder that handles your TMR ingredients including long stem hay. Pictured is the RA2250.

### Farmhand & Dunham Lehr Loaders

- Quick-Tach mounting
- Convenient single lever control
