COMPARE THESE FEATURES AND OPTIONS

- Simple hydraulics** allows one valve to operate the lift and stabilizer cylinders. Center plumbing means less hose length and easier coupling.
- The basic box** is heavy-duty steel, welded seams, and reinforced for even more strength.
- Standard offset hitch** adjusts in 5-inch steps to lengths from 6' 3" to 7' 11". To allow for different row crop spacings you can offset either right or left 5", 7 1/2", 10" or 12 1/2" inches.
- Rub rails** offer more protection to vehicles when approaching during dumping cycle, and when departing.
- Stabilizer cylinders** hydraulically lock on to axle to hold wagon rigid during dump cycle.
- Galvanized roof** features vent insert for straight-through air flow.

The model 700 dump wagon is designed for years of trouble free service. The hydraulic system with a cable assist is designed to unload large loads of up to 20,000 lbs. quickly and efficiently, even if the load is not distributed evenly.
