This shorter, early hybrid has excellent yield potential and standability. Performs well in all environments and really produces on well drained soil. Stays green and takes the stress. 4227 performs best when populations are slightly higher than average for the area. Final Populations: 20-26,000+

6227 New (108-111 Days)

Excellent yield potential and very good standability. Diesease insures excellent stay green and harvestability. Responds to good management, soils, and fertility Has tight husk for less kernal damage. Final Populations

8027 New

(115-120 Days) Widely adapted throughout the Eastern Corn Belt. Very good stay green, ear retention, yield stability, and stalk quality. Excellent range in disease tolerance and corn borer tolerance. Can be adapted to a wide variety of management and environmental conditions.

Final Populations: 20-24,000+
