ROSKAMP STATIONARY CORN SILAGE ROLLER MILL

We
Will
Demonstrate

Roskamp
Rental Unit
Available

FOR DAIRY

Rolling silage fresh - just before feeding - increases milk production.

FOR BEEF

Less silage is required per pound of gain when silage is freshly rolled before feeding.

FOR HOGS

Freshly rolled silage, with all kernels cracked and all cobs crushed provides a highly palatable and more readily assimilated feed for sows.

DUAL PURPOSE

Hi-moisture or dry shelled corn can be metered into the Roskamp Silage Mill Hopper along with the silage for a uniformly mixed and digestible ration.

University tests have proven that 20% of high moisture whole corn passes through the animal's system undigested. This means every fifth scoopful of expensive grain is left on your feedlot!

That's why it's money in the bank to freshly roll every bit of high moisture or dry corn just before feeding. Freshly rolled feed is the most palatable and digestible.
