 Offer good through October 31, 1988, at participating DeLaval Dealers.

DE LAVAL The De Laval® FEED CAR Stanchion Feeder

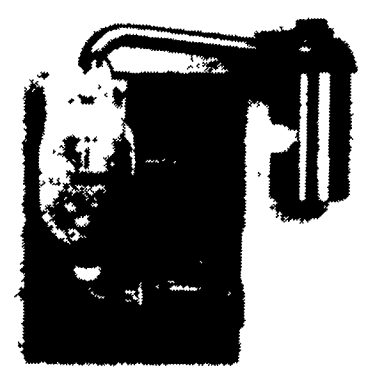

NOW... All the advantages of automatic individually controlled feeding is available for stanchion and tie-stall barns.

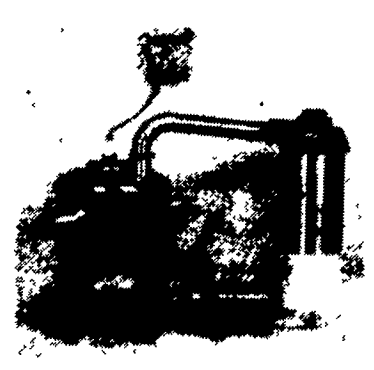

The principle of feeding little and often is now available and affordable. Now 30-40 cow operators can have the same benefits as large operators. You can give each cow an individually programmed ration based on milk production, stage of lactation and other factors you want to consider, feed small amounts up to 10 times every 24 hours. It's accurate and automatic, feeds 4-to-5 cows per minute with one or two types of feed; and has optional automatic refill. Travels around your barn on an overhead monorail. Owners report it can pay for itself in 18 months or less.

Standard Stainless Steel Highline Group

Exclusive DeLaval Features Help You Protect Milk Quality

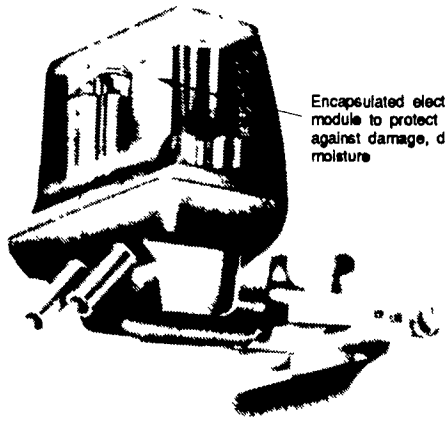

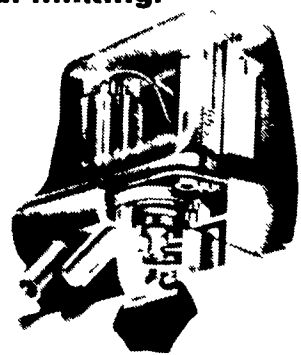

HIGH CAPACITY CLAWS FOR INCREASED PRODUCTION

Alfa-Laval has set the standard for milker claws worldwide, with two super claws — the Flo-Vu Claw and the Super Flo-Vu Claw. Both are stainless steel and superbly-finished for easy cleaning and sanitizing. Both feature automatic shut-off which helps prevent contaminants being drawn into the milking system and vacuum fluctuations if a unit is kicked off. And both have an air valve which meters-in just the right air flow to speed milk to pipeline or bucket. They're also easy to clean — just twist open and close with your bare hands.

UPGRADE TO DELATRON PULSATION

Choose Delatron I or Delatron II Pulsators... and bring new precision to your milking.

Encapsulated electronic module to protect against damage, dirt, moisture

Unique servo mechanism provides high capacity airflow with low energy coils

...the most advanced and precise pulsation available anywhere

- Precise-Accurate
- Less Maintenance
- Microchip Electronics
- 70:30 or 60:40 Ratio At 60 PPM
- Alternating 12 Volt Pulsation
- Light Weight (4 oz.)
- Pipeline Or Parlor

Convert Your DV-300 To DELATRON II Pulsation

First In Stanchion Barn Automation DV-300™ MILKER.

This unique system senses milk flow and automatically shifts vacuum levels and pulsation rates between stimulation, milking and post-milking phases. Provides affordable, automated, flow-controlled milking. The DV-300 reduces your man-power requirements and makes milking easier, while giving every cow the individual attention she needs. It is now available with the Ultimate Pulsation-Delatron II DV pulsation.
