

Scenes From Dairy Shrine Banquet

Guest of Honor at Dairy Shrine Awards Banquet, John Morris (center) with Mrs. Morris and Eugene Meyer, Presenter.

Governor Robert P. Casey (right) receives recognition from Oble Snyder for administrative support of the PA All-American Dairy Show.

Distinguished Dairy Cattle Breeder Award, (L-R) George Opperman Dairy Shrine President Hope Scott; Honoree Mary Binney Wheeler, Presenter and Bill Maynard newly elected Shrine President.

Chore-Time's ULTRAFLO® feeder can free you from your chains

We have probably been too modest up to now about the merits of our new generation ULTRAFLO® cage feeder vs. the old style chain feeders some of our competitors are still trying to sell you. In fact, the only negative comments about our feeder come from our competition, not our customers. So we would like to point out the bare facts:

FEED SAVINGS: On-farm results show a feed savings of 1/2 lb. per 100 birds per day - over \$10,000 per year savings on a 100,000-bird house Year after year.

TROUBLE-FREE DESIGN: Our feeder has only two moving parts - the one-piece auger plus each drive wheel; their chain has more. Our corners are heavy 12 ga. zinc plated tubing for long life; their corners have a reputation for trouble and short life

PROVEN DESIGN: Over 10 million birds are already on our feeder worldwide Also, it was proven in 5 years of on-farm testing before introduction.

EASY ADAPTABILITY: Ours adapts easily to existing cage systems you may already have. Or choose from our wide selection of cage styles.

5-YEAR WARRANTY: Ours gives you a 5-year warranty on auger and trough. Theirs doesn't. In fact, their dealers derive a large percentage of their income from parts sales Ours don't.

MICROPROCESSOR CONTROL: Our control lets you program feeding time to the second, to match the exact time of one circuit. Control number of feedings, time of each feeding - also 10-second "Stimulation Cycles" between feedings, to minimize separation, and improve your birds' feed intake

SIMPLE OPERATION: "Push-pull" Power Units with 1/2 or 1/2 HP motor are located in a cage, have hardened steel gears for trouble-free operation

HI-GRADING OF FEED: Our auger travels at 80 FPM so birds are limited from eating until it stops, birds will hi-grade feed from chain feeders, causing uneven nutrition

REMIXING FEED: Our auger slowly revolves, remixing old and new feed; theirs leaves most old feed to get stale

BILLED-OUT FEED: Our auger acts as a grid to prevent birds from raking, piling, and throwing out feed; neither chain or disk systems prevent feed waste

COST SAVINGS: Ours saves vast amounts of energy costs since it's easier to propel and runs only half as long as theirs

LOW MAINTENANCE: With our 5-year warranty on auger and 20 ga. trough (one competitor has only 22 ga.) - plus no corner wheel mechanisms to wear out - ours saves you maintenance costs

If we sold our research farms, we could cut the price of our feed for you, we could cut our research - or do a lot less. Our investment in 2,700 acres - and in livestock, buildings, equipment and people - isn't to be sneezed at. Neither is the investment in our research laboratories and the people who work in them. Nor what it takes to run a field-research program on cooperating farms and ranches in many states. But cutting corners in research and in other ways wouldn't make much sense. It isn't the price per ton you pay for MoorMan's Mintrate® or Premix-trate® that counts - it's how efficiently these highly concentrated MoorMan Products can help you turn grain and roughage into growth, gains or milk.
