Binkley & Hurst Bros., Inc. Is Your Place To Buy One Good Spreader For A Two-Spreader Farm

THE NEW 300 SERIES GEHL LINE OF QUALITY SCAVENGER SPREADERS

From Liquid To Stable Manure To Make Hauling A Pleasure

HANDLES ALL KINDS OF MANURE-LIQUID, SEMI-SOLID, PEN PACKED, EVEN FROZEN

The Big Difference: A Square Auger

Fewer Moving Parts, Fewer Breakdowns

Let's face it... no one likes to handle manure. Or worse, struggle with broken-down manure handling equipment. A Gehl "300" is a simple spreader. One with no unreliable flails. No leaky endgates. No brittle apron chains. A solid, durable spreader. With sealed, welded Unibody construction. Ruggedly built to give you top performance... year after year.

With a full 10-year warranty against rust-through on the tank. A Gehl "300" is what every ordinary spreader is trying to be... the most machine for your money.

300 Series auger Conventional auger

The right pitch is important, because round augers with unusually large pitchers often move manure too quickly to the front of the spreader where it overflows before the discharge is able to spread it. Hydraulic power helps the auger solve two of your biggest spreading problems. Move the auger up and down to chop through bridging. And in winter, park the auger in the "up" position, then power down to slice through frozen material.
