## Brillion AUTOMATIC RESET DEEP TILL

**REDUCE COMPACTION**  
Deep Till Penetrates As Deep As 18 Inches

**CONTROL WIND & WATER EROSION**  
Residue Left On Surface Ties Down The Top Soil

**BREAK UP HARDPAN: SHATTER THE SOIL**  
Soil Is Aerated; Crops Respond With Better Yields

### TWO-BAR OR FRAME

The frame type DEEP TILL is available with a Category II or III hitch and may be equipped with the optional drawbar hitch to convert it to a pull type. The hitch features both clevis and straight drawbar for four-wheel drive tractors. Adjustable top arm controls the front-to-rear leveling of the machine. Sizes range from 12'6" to 27'6". Hydraulic gauge wheels control working depth from 8" to 18". The pull-type hitch is easily removed to convert the unit to a 3-point Category III hitch model. The automatic reset feature on all models allows one-way tilling and eliminates the inconvenience, downtime and expense of reversing draw belts. All frame type Deep Till may be used with either front-end or rear-end tractor mounting.

### SINGLE RANK MODEL

The three shank model, shown below, has a Category II hitch. With a cutting width of 7'6", it is ideal for operators with smaller acreages and horsepower. It is extremely maneuverable, yet provides the same basic deep tilling job as its "big brothers". The single rank model provides simplicity and durability. It is available in 3, 5 and 7 shank sizes, in working widths of 7'6", 12'6" and 17'6". Shank spacing is 30" but can also be set at 20" in light trash conditions. Single rank models are close coupled to the tractor for effective control and maneuverability. Manually adjusted gauge wheels control working depth to 18". A speed of 4 1/2 to 6 MPH is recommended.

### SLICK CONCRETE CAN BE ROUGHENED

SCABBLING is an effective way to avoid unnecessary losses of cattle. The SCABBLER makes bands about two inches wide approximately 1/8" to 3/16 in. depth. This gives sufficient area for good footing while allowing you to scrape the smooth surface as before. It is near enough to the surface to give your cows full advantage of the roughness and deep enough to remain effective for years. It greatly aids in heat detection.

And the good news is that it is reasonably priced. You have the choice of doing it yourself or having us do it for you. We offer service right to your door. Call us for more details.
