

Global Market Expands For Agriculture

PHILADELPHIA — The American farmer is already feeding much of the world's population, but as the number of people on our planet continues to grow, we must continue to look for new ways to push our agricultural goods into the developing world, says Mary Jo Keating of DuPont Industries.

"The world hunger problem is not a result of food shortage, but of poverty," Keating said. "We need to help these Third World

nations develop in every way in order to open up more markets for our goods."

Keating made her remarks to the 13th Annual American Agri-Women Convention in Philadelphia.

"Statistics on food production can be frightening, but are not necessarily cause for alarm because our potential is so great," Keating said. Projections indicate that the world will have to produce as much food in the next 30 years

as it has in all of recorded history to keep up with demand.

But advances in agronomy and agriculture should allow us to do this. "As long as artificial trade barriers are removed and we can get the food to the people who need it, there should be no problem in having enough food to feed the world," Keating said.

A major force in the increase in the world's agricultural output will be the ability of developing nations to provide for their own

needs. Newly industrialized nations such as South Korea prove that, with shared expertise and assistance, it can be done.

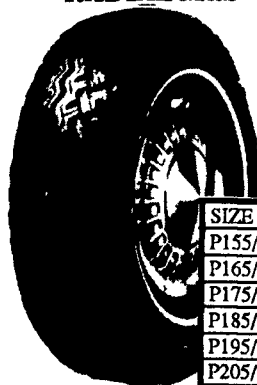

Africa remains our greatest challenge for the future," Keating

said, "but if we can work with the people and governments to educate and assist the farmers, we should be able to go a long way towards eliminating critical food shortages there."

WINTER TIRE SALE

STEEL BELTED RADIAL M&S

- 2 Steel Belts
- Polyester Cords
- Pinned For Studs

SIZE	COST

CORN GROWERS

CALL ME FOR NEW AP 595

ADVANCED YIELD POTENTIAL PLUS GOOD TOLERANCE TO GREY LEAF SPOT.

AP 595 is a high yielding hybrid with a similar plant stature to HP 470. It has very good stand ability and excellent stay green characteristics, and it produces a medium length, girthy ear with good test weight grain. It even has good tolerance to Grey Leaf Spot. Call me today for more information on New AP 595 and we can discuss the right selections for your farm.
