

**No one else builds them this well . . .
 . . . so no one else warrants them this well**

Why settle for 2nd best - when Fiberdome now manufactures the most advanced fiberglass bulk bin available!

- Eliminates bridging, won't rust or corrode
- Cuts heat buildup and condensation
- Feed stays fresh in any weather
- Precision engineered for long, long life
- Unique 5-year warranty
- Adaptable to any auger or feeding system

Write for a full color brochure and a free sample of fiberglass - the modern material used for high-performing bins.

 OPERATE A MORE EFFICIENT SILO WITH...

FIBER FUNNEL

VERSATILE
 Fiber-Funnel is adaptable to any conventional silo chute (steel, fiberglass or concrete). Fiber-Funnel is easily removed from the base connector to allow access to the silo chute for servicing

DURABLE
 Fiber-Funnel's fiberglass construction is strong, lightweight and totally non-corrosive. No rust — no rot — no moving parts to wear out or seize

EFFICIENT
 The patented Fiber-Funnel system is available in two discharge styles (20' and 40') to accommodate any silo requirement and can be adjusted to any length by simply cutting the optional 9" extension pipe. The unique design of the Fiber-Funnel stops silo chute updrafts. Fiber-Funnel is easily maintained with simple tools and an electric drill or have your dealer arrange the installation

Fiberdome

SILO CHUTE
 Made With Fiberglass,
 The Material Of The Future - And Proven In The Past!

The Fiberdome chute is designed and engineered to be installed on most types of silos. Its structure allows it to withstand the toughest beating the weather elements or silo unloading systems can possibly dish out.

The chute is constructed in full 7 1/2' sections to minimize the number of joints. Connecting joints have a 2 1/2" tongue and groove design to keep feed in and water out. The large ribbed construction adds stability and strength.

Fiberglass is durable, corrosion-proof, attractive and translucent, allowing sunlight to pass through. Sunlight quickly dries interior moisture in the chute. The hard gleaming gelcoat surface will remain for many years.

How Can You Raise Healthier Calves?

Fiberdome CALFhutches are your answer

Raising calves is a tricky business. That's why modern calf raisers are going to individual hutches... to help save more calves by cutting down on pneumonia, scours and hoof problems. Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns.

You can be assured of this kind of healthier environment with Fiberdome CALFhutches. Their unique one-piece construction of heavy gauge fiberglass makes them weather-proof, so they will last indefinitely with normal care. No joints for moisture and bacteria to creep through. A white gel-coat finish keeps them cool in summer.

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage.
