Sheep Convention To Be Broadcast

DENVER — America's newest superstation, RFD-TV, will broadcast programs on the American Sheep Industry Convention at 2:05 p.m. (CST), Jan. 20 and 23. In addition, a rebroadcast of convention highlights will begin at 1:05 p.m. (CST), Jan. 28 and continue for several hours.

RFD-TV broadcasts on Spacenet 1, Channel 23 (S1/23) and its signal is rebroadcast by a number of low power TV stations across the country.

The sheep industry convention programs will feature speakers, interviews and special events taped the previous week at the U.S. sheep industry's premier event. The program will focus on industry issues such as lamb marketing, wool marketing, management, economics and finance. The "Make It Yourself With Wool" fashion show featuring contestants from 47 states will also be part of the broadcast.

"The 114,000 sheep producers in the United States and thousands

more in Canada need the latest information to remain competitive in a changing world," said Patrick Gottsch, RFD-TV chairman, in announcing the special series. He emphasized that RFD-TV is committed to meeting those needs.

Omaha based RFD-TV began operating in August 1988 and broadcasts 24-hours per day. Programming is targeted to viewers interested in agricultural production and marketing. The signal is not scrambled, thus making it available free of charge to all satellite receivers in North America, 70 percent of which are in rural areas.

Rodger Wasson, executive director of the American Sheep Producers Council says information is a key to success in every industry. The U.S. sheep industry, which is growing after years of decline is no exception. In many areas producers have difficulty obtaining current information on sheep production and marketing. "We are pleased that RFD-TV's

progressive management is accepting the challenge to provide sheep producers with current information," Wasson says.

For Yield... W-L alfalfa stacks up. FOURTH YEAR WL Competitors

W·L Alfalfa varities are strong producers throughout the life of your stand. You can't afford to settle for less. If your alfalfa doesn't make it to the fourth year, you've reduced the overall profitability of your crop.

In test after test by public and private researchers, W-L alfalfa yields stack up for profits. For more than 25 years, W-L alfalfa varities have been bred for long stand persistence, quick recovery after cutting, multiple pest resistance and extra leafy, fine-stemmed forage. With proper crop management, you'll have strong fourth-year yields that stack up for a profitable crop.
