

# “...our test is significantly higher...”

**DAVID C. BURKET  
BURKET FALLS FARM, EAST FREEDOM**

101 head registered Holsteins

19,500 lbs. milk, 711 lbs. BF, 3.92%

John, David, Dave Jr. & Frank Burket

“Why did we build a Harvestore® system from Penn Jersey for haylage? Convenience!! We didn't like the dirty chute. And now we have the convenience of being able to fill and feed out at the same time. With Harvestore-processed haylage, we felt we would be able to make a substantial savings in purchased feed costs.”

“We try to put our haylage in the Harvestore structure at about 40-45% moisture. With our Harvestore System, we're able to feed a fermented feed all the time. Anybody who knows anything at all about milking cows knows that green feed is not good for them. The cows seem to have a very good appetite for the Harvestore-processed haylage. We had no trouble switching the cows to the haylage.”

“We feed about 2/3 Harvestore-processed haylage and 1/3 corn silage in our feed ration to the milk cows. Our total mixed ration is mixed for 60 lbs. milk in a stanchion barn.”

Dave Burket, Jr. with the Goliath unloader

“The butterfat is better on our dairy herd since feeding haylage from our Harvestore System. Our test is significantly higher. It's an average of two points better with Harvestore-processed haylage.”

“And our Goliath® unloader does a good job taking feed out of the Harvestore structure. It takes 12 min. three times a day to feed the 100 milk cows with the new update kit on the unloader.”

**Thanks to our many customers and friends who stopped by to say hello during Farm Show!**

The results you may achieve with your Harvestore® System depend primarily upon your management skills and may vary from successful results achieved by others. Any application to a particular farming operation requires the advice of qualified experts and is subject to limitations of good management, weather and other conditions present at the individual location.
