All-aluminum, insulated inlet baffle allows exact control of incoming air.

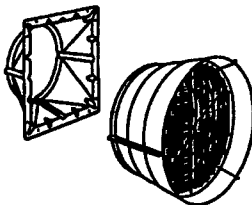

Fans are the most noticeable part of a ventilation system. But the air inlets are no less important and must be properly adjusted to maintain good air distribution as the rate of airflow varies. Aerovent's Aero-Baffle is specifically designed to meet this need in confinement buildings.

The Aero-Baffle hinge section is designed for trouble free operation, even in the most adverse conditions. The hinge allows infinite adjustment of the baffle from "full closed," against the ceiling, to "full open," against the sidewall.

Special Feature Of This Facility!

The Shape of Efficiency
aerovent
Fan & Equipment, Inc. • 929 Terminal Road • Lansing, MI 48906 • (517) 322-2530

Discharge Cones
These inexpensive attachments increase operating efficiency up to 17%. Constructed of durable, non-corrosive Rovel®/ABS, for direct-drive, painted metal for belt-drive units. Cones also can be easily added to existing units.

This farm, which is owned by Tri Farms Inc., is operated by Paul and Carolyn Van Grouw, and features the following facilities and equipment:

- A 40'x160'x10' high dairy barn for 60 cows
 - with Show-Ease Custom 6 Stalls
 - with Show-Ease water bowls
 - with two 12'x14' boxstalls
 - with rubber cow mats in stalls for animal comfort
 - with tile feed troughs
 - with attached 14'x20' feed room
 - with 40'x86'x8'6" high second floor used as storage area
 - with attached 28'x30' milk room and utility area, including office, medication room, and rest room
- A ventilation system in the dairy barn designed by Aerovent Fan & Equipment, Inc.
 - providing all season ventilation with continuous baffle inlet along both sides of the stable
 - including high efficiency fans with discharge cones for increased air flow for hot weather ventilation
- A 36'x48'x14' high pole building for use as a heifer facility and for equipment storage.
