

# Reel Auggie

2000 Series

A new concept in TMR Mixers

The Mixer/Blender/Feeder that handles your TMR ingredients including long stem hay. Pictured is the RA2250.

## Reel Auggie Mixing Chamber

The reel turns slowly and gently lifts material into the two blending augers. The lower auger is notched and moves the material forward. The upper auger, which moves the material rearward, features replaceable knives which assist the blending of long baled hay or other tough roughage materials.

### Advantages of the Reel Auggie Design

- \*Blending long hay, other roughages, and by-product materials.
- \*Reduced mixing time with lower horsepower requirements.
- \*Reduced material breakdown, fluffier material consistency and faster, more even unloading.
- \*Power chute optional in tow and truck mount applications.

Stationary - Tow - Truck
