DE LAVAL ...YEAR ROUND PERFORMANCE

FIRST IN STANCHION BARN AUTOMATION

DV-300™ MILKER. This unique system sense milk flow and automatically shifts vacuum levels and pulsation rates between stimulation, milking and post-milking phases. Provides affordable, automated, flow-controlled milking. The DV-300 reduces your man-power requirements and makes milking easier, while giving every cow the individual attention she needs. It is now available with the Ultimate Pulsation Delatron II DV pulsation.

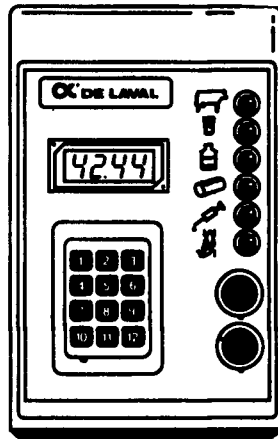

IT PAYS TO WEIGH MORE

If you're not using weigh devices in the parlor, chances are you're wasting a lot of money. Because weigh devices help you operate more efficiently. They can provide you with better management information — the information you need to make the right decisions at milking time.

DeLaval offers a wide range of weigh devices to meet your milking requirements. From economy units to glass weigh jars to the most technically advanced milk meter ever developed, your DeLaval dealer has the weigh devices you need at a price that meets your budget.

Remember, it pays to weigh more. So talk to your DeLaval dealer today, and discover all the advantages of installing DeLaval Weigh Devices in your parlor.

PRECISE PULSATION For Uniform Milking

If you want the most uniform pulsation possible, then you need the solid state technology of a Delatron™ Pulsation System from De Laval.

Delatron Pulsators use state-of-the-art electronics to provide consistent performance with the highest reliability. They offer you a choice of ratios (70/30 or 60/40 at 60 PPM) for your parlor or pipeline milkers, can be stallcock- or pipe-mounted and are available with a built-in air filter.

What's more, Delatron Pulsators offer other unique features, including our exclusive servo valve and our low voltage design. Plus, they allow you to individually control up to 20 pulsators using just one master controller.

To learn how a Delatron Pulsation System can improve the efficiency of your milking operation, see your De Laval dealer today.

FINALLY, A LINER WITH STAYING POWER.

If you think frequent liner slips and fallouts are unavoidable, you're living in the past. Now there's a new liner that stays on the job when others fail: ClingSoft® 6100.

- Narrow bore is gentle on teats
 - Provides complete, fast milking
 - Beefed-up ribbed area near liner and virtually eliminates claw nipple punctures
 - Unchlorinated rubber surface prevents premature aging, makes liner easier to keep clean.
- Put the liner with staying power to work for you. ClingSoft 6100.

Tests show this liner can dramatically reduce slips and fallouts. Dale Langenkamp of New Weston, Ohio saw a 77.8% reduction in slips and a 100% reduction in fallouts compared to a Milk Riite® liner. Think of the valuable time that could save you, let alone the reduction in teat end impacts and chances for milk contamination. But that's just for starters.

You Can STOP Livestock Breakouts

- STOP Chargers are:
- Safe and Effective
 - State-of-the-Art Electronics
 - Built to Last
 - And they carry a TWO-YEAR WARRANTY!

So if you're tired of animal breakouts, ask your DeLaval dealer to help you select the STOP Electric Fence Charger that fits your needs. He can also show you a full range of STOP accessories to complete your total fence system.
