

A STRAIGHT LINE IS STILL SHORTEST

Case International Rectangular Balers 8520/8530/8540/8550/8580

That's why all five 8500 Series Case IH Rectangular Balers give you center line design. Your hay moves in a straight line from the time it's picked up until it leaves the baler as a tight, uniform bale.

Center line means there are no corners to turn to get crop into the bale chamber as with conventional balers. Nutritious leaves go into the bale, not on the ground. And with the baler directly behind the tractor, it's easy to transport through narrow bridges and gates.

Case IH Rectangular Balers also give you:

- Wide, low-profile pickups collect full, heavy

windrows with leaf-saving gentleness because the crop is not lifted as high to get it into the baler

- Prepacker chamber compresses hay into uniform flakes
- Flake size, density and bale size are more uniform
- High-speed, short-stroke plunger to pack bales tighter
- Hydraulic density control (optional on 8540, standard on 8550/8580) to regulate chamber pressure for tighter, square-shouldered bales for easier stacking

Produce tighter, more uniform bales — on schedule.
