COMPARE THESE FEATURES AND OPTIONS

Simple hydraulics allows one valve to operate the lift and stabilizer cylinders. Center plumbing means less hose length and easier coupling.
The basic box is heavy-duty steel welded seams, and reinforced for even more strength.
Standard offset hitch adjusts in 5-inch steps to lengths from 6'3" to 7'11". To allow for different row crop spacings, you can offset either right or left 5, 7 1/2, 10 or 12 1/2 inches.
Rub rails offer more protection to vehicles when approaching, during dumping cycle, and when departing.
Stabilizer cylinders hydraulically lock on to axle to hold wagon rigid during dump cycle.
Galvanized roof features vent insert for straight-through air flow.
