# TEST WALK THE LATEST DESIGN IN HI-RISE BREEDER HOUSE TECHNOLOGY

**TUESDAY  
JULY 25  
10 A.M.-3 P.M.**

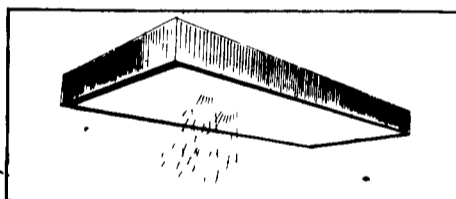

**T & J  
BREEDER  
FARM**

Tom & Julie Waltersdorff  
Spring Grove, PA

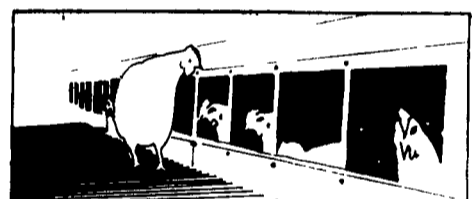

## HI-RISE FULLY SLATTED

The fully slatted hi-rise design eliminates the manual labor involved in cleaning out poultry houses. The clear open house allows for better interaction of cockerels and hens, which enhances egg hatchability.

## FULL SPECTRUM LIGHTING

The full spectrum system provides light which closely replicates natural sunlight. This provides an environment for optimum egg production.

## AUTOMATED SYSTEMS

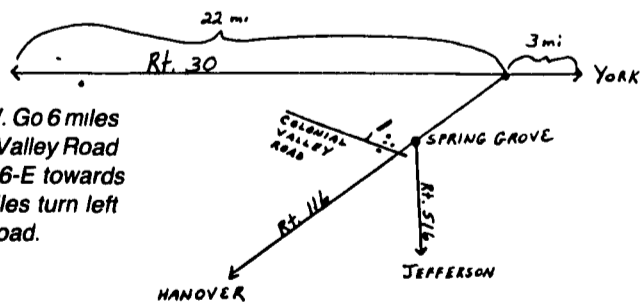

The combination of labor saving equipment for feeding, water, egg handling and ventilation systems allows the farm manager to reach for the finest results possible.

## FEATURES

- Jay-Dee rollaway nesting
- Jay-Dee egg belt collection
- Big Dutchman Chain feeder
- Big Dutchman ventilation
- Val-Nipple waterers
- Big Dutchman feed bins with Motavator

**Directions:**

From Rt. 30 take 116-W. Go 6 miles turn right onto Colonial Valley Road  
From Hanover take 116-E towards Spring Grove. Go 8 miles turn left onto Colonial Valley Road.
