(Continued from Page A3)

ACRES WHEAT UPDATE:

Wheat futures prices closed higher again today, settling from unchanged on the May option to 2-3/4 cents higher on the September and December options. Price

support was attributed to talk of increased demand with Turkey interested in 375,000 metric tonnes and other smaller deals in the works. The USDA announced a sale of 110,000 metric tonnes of hard red wheat to Iraq after today's close. News that an announcement would be made today concerning indictments on the investigation into trading abuses at the CBT kept many traders on the sidelines. September settled today at \$3.90-1/4 after trading in a range from \$3.87-1/4 to \$3.91-1/2.

ACRES CATTLE UPDATE:

Live cattle closed sharply higher while feeders posted moderate gains. Price support was linked to a firmer tone in the cash markets and late short covering. Prices for fed cattle today were \$.50 higher with today's rally in futures expected to boost cash prices to \$72.50 by the end of the week. Opening support was tied to an increase in beef cut out values yesterday. Feeders were higher on spillover support from live cattle with gains pared in the spot August by commission house sales.

ACRES HOG UPDATE:

Live hog futures settled nicely higher this afternoon with gains posted from \$.38 to \$1.23/cwt higher. Support was attributed to firming cash fundamentals and commissionhouse fund related short-covering. Early strength was tied to reports of lighter than expected runs and expectations for a continued strengthening this week in cash markets. Bellies closed higher on spillover from live hogs and short-covering in response to ideas the pit was oversold. Steady quotes midday added further support. October live hogs were boosted by technical buying after buy stops were activated near \$39.75/cwt.

How KINZE designed the world's best Auger Wagon.

Low-profile, extra-big tank means more clearance for the combine auger. Less than 10 ft on all models.

High-flotation tires... standard equipment! So you keep moving, even in soft, greasy fields

Finest American-made, industrial grade components money can buy, with chain oiler and grease bank for easy maintenance

2:1 sprocket reduction drive system. Especially important when unloading high-moisture grain

We put the auger up front, where you can see it... control it. Over 12 ft unloading height.

Hydraulic fold, self-aligning augers, and over-center locks

3-minute unloading with vertical and horizontal augers. You're unloading at full capacity, wet or dry, from start to finish. Means less grain damage because augers run full. Much more efficient than single auger carts

Call your nearby KINZE dealer today and discover the "quality force" in moving grain.
