FORAGE BLOWER

Adjustable shear bar prevents feed carryover, minimizes power consumption

Big throat design for unrestricted material flow

Rotable band for angular discharge

Water inlet standard

High strength (Corten) rim sheet for unmatched durability

Louvered air vent for unrestricted air intake

Flexible windguards minimize spillage

Positive throw out clutch can be reached from all around the hopper

10" intake auger evens out material flow for smooth operation.

Adjustable stabilizer stand

High-volume air filling begins with Badger's "throw action" hopper. This hopper actually lifts and throws sticky haylage right into the intake auger. Hoppers on both models are over 34" wide and only 20" high (with wheels removed). 1000 RPM hopper extends beyond the fan housing 19" to make load positioning easier. And, it's easy to see Badger's simple hopper drive is less complicated than dual "whirling tables."
