NEW CHORE-TIME SWISH POULTRY WATERING SYSTEMS for broilers

18 14 Houses Sold In The Last 6 Months!

Here Is Why Area Broiler Producers Are Switching To SWISH:

- Growers Are Getting Best Results In Feed Conversion And Weight Gain With Swish Cups, And Earning Top Bonuses.
- The Patented Valve Is Reliable And Keeps The Cup Clean And Litter Dry.
- Swish Cups Are Designed To Provide Higher Volume, Fresher And Colder Water During Hot Weather.
- Swish Cups Are *LESS EXPENSIVE* Than Nipple Drinkers.

Why our "Self-cleaning cup" performs best

A cup drinker is the most natural way for a bird to drink. Compared with a nipple, birds drink more water from a cup. This makes heavier birds

And our cups perform better than other brands. We believe there are several reasons for this:

1. On most of our systems, the water supply is thru a pipe at ground level, so the water stays cooler and much more refreshing.
2. Compared with "bell type" drinkers and others with standing water, our cups let each bird trigger its own fresh water,

which increases consumption since it's fresher, cooler, and more appetizing.

3. Unlike nipples which can get too low or too high, our system is more forgiving of uneven floors. If birds can reach into the cup, they can drink.
4. Our system provides easy access to water for brooding birds as young as one day old. Float balls snap onto trigger to automatically raise water levels and attract young birds.
5. Nipples frequently dribble water on the floor and bell waterers collect dust into the water. Compare our benefits with theirs. We also offer a deep cup for

use with roasters to help keep your floors dry
6. Other cups don't offer the unique "swishing action" ours do. So feed can accumulate and get other brands of cups dirty and packed with stale feed. Birds just naturally prefer a clean cup

(See illustration in box above for how our cup was designed to be the only self-cleaning cup available today)

CHORE-TIME/SWISH — we believe it's the best watering system available.

See back of sheet for the systems we offer for various applications.

CHORE-TIME SWISH Self-Cleaning Cups Are Available In Continuous Lines or 8 Ft. Drinkers
