SIMPLE ECONOMY.

The Kubota L2050 compact diesel tractor was designed to combine versatility with operating economy, pure and simple. With eight forward speeds, the Kubota L2050's powerful, four-cycle 20PTO HP diesel engine delivers ample power for most farming tasks. Direct fuel injection increases fuel economy. High torque rise allows the Kubota L2050 to recover from sudden load increases that will stall most conventional engines. Versatility is guaranteed by optional quick attach implements like a front loader, box scraper, mud-mount mower and tiller. Put the Kubota L2050 to work. It's simply economical.

KUBOTA
Nothing like it on earth.

THE QUICK REVERSE.

You might say the L3750 is quick on its tires. With eight forward and eight reverse speeds plus your choice of a mechanical or hydraulic shuttle-shift, all kinds of front loader jobs go quick. The L3750 is even a smooth mover under the hood. A new 5-cylinder diesel engine improves performance over a smaller engine, without the fuel consumption of a bigger engine. Other features that help make the work go quickly include a cleanly designed operator platform with the gearshift controls within easy reach at your fingertips. Not underfoot. So see the 36 PTO horsepower Kubota L3750 soon. Or make that quick.

KUBOTA
Nothing like it on earth.

DIRECT INJECTION DIESEL.

Kubota has a compact tractor with direct fuel injection. The L2250 has a 3-cylinder engine with 21 PTO horsepower. Plus it has direct injection for improved starts in cold weather and better fuel economy, too. Other standard features, not so standard on most tractors of this size, include rear- and mud-mount PTO for maximum versatility when it comes to attaching implements. Surprising, wet disc brakes are standard, too. Power steering is standard on the deluxe model. Our operator platform is designed for increased comfort, with all the important controls at your fingertips. Not underfoot. To find out more about the Kubota L2250, please direct your questions to us.

KUBOTA
Nothing like it on earth.

WORK A SHORT SHIFT.

The Kubota L4150 makes short work out of shifting from forward to reverse. And that makes loading, leveling, grading or any other kind of work on a construction site go faster, too. It comes with an 8 x 8 partially synchronized manual transmission. Or choose an optional hydraulic shuttle shift for quick reverse capability. You never have to touch the clutch. There are also eight forward and eight reverse speeds. So it's easy to select the best speed for any job. So come see the Kubota L4150. It could help shorten your workday.

KUBOTA
Nothing like it on earth.

"Financing As Low As 2.75% At Participating Kubota Dealerships Through September 30, 1989."
