Cut Costs, Not Corners.

With the Bush Hog Squealer, it's a Bush Hog rotary cutter at a smaller price. But don't let the price fool you. The Squealer is engineered with the same quality features that are making Bush Hog the biggest name in farm implements. The Squealer is a Bush Hog design, and features a patented cutter blade tip, more than other economy cutters, for more efficient cutting. The optional elliptical blade pan on the 48" and 42" wide models, and the standard

elliptical blade pan on the 48", 60", and 72" wide models are similar in design to the blade pans used on larger Bush Hog cutters, only scaled down a little, to each of the Squealer's five sizes. So while the Squealer may be inexpensive it's no toy. It's tough, it's efficient. Because like all 100 Bush Hog implements, including the 20 new models

we've introduced in the last 12 months, it's engineered to cut what needs cutting most in farming these days. Costs

SLICK CONCRETE CAN BE ROUGHENED

SCABBLING is an effective way to avoid unnecessary losses of cattle. The SCABBLER makes bands about two inches wide approximately 1/8" to 3/16 in. depth. This gives sufficient area for good footing while allowing you to scrape the smooth surface as before. It is near enough to the surface to give your cows full advantage of the roughness and deep enough to remain effective for years. It greatly aids in heat detection.

And the good news is that it is reasonably priced. You have the choice of doing it yourself or having us do it for you. We offer service right to your door. Call us for more details.
