They Are Going So
Why Not Choose
Yours Now!**

Our Trunnion Bearing is designed to mount on our C-Flex™ spring cushioned bearing standard and is allowed to self-align as the gang flexes. Part of the secret to the Trunnion Bearings' longevity is 2-triple lip seals and metal seal washers that prevent dirt from contaminating the inner workings of the regreaseable bearing. Excellent seal protection, of course, reduces wear and helps eliminate premature bearing failure.

RICHARDTON

COMPARE THESE FEATURES AND OPTIONS
Simple hydraulics allows one valve to operate the lift and stabilize cylinders. Center plumbing means less hose length and easier coupling.
The basic box is heavy-duty steel, welded seams and reinforced for even more strength.
Standard offset hitch adjusts in 5-inch steps to lengths from 6'3" to 7'11". To allow for different row crop spacings, you can offset either right or left, 5 7/8", 10" or 12 1/2" inches.
Rub rails offer more protection to vehicles when approaching during dumping cycle and when departing.
Stabilizer cylinders hydraulically lock on to axle to hold wagon rigid during dump cycle.
Galvanized roof features vent insert for straight-through air flow.

Make Your Operation Safer • Use Year Round • Variety Of Crops
• All Field Conditions • Operate In Wet And Muddy Conditions
