

Ford New Holland Promotes Awareness Of New Products Made With Farm Commodities

ROCHESTER, IN. — Ford New Holland has thrown its support behind farmer efforts to raise public awareness of new products made from farm commodities. The company is distributing its 1989 Farm Progress Show material, not in the traditional plastic bags, but in degradable bags made from corn.

"This move is a demonstration of our efforts to make the public more aware of the renewable resources produced by the farmer," said Gor Cowl, executive vice president for sales and marketing. "Each bag carries the official

degradable plastic seal that lets the public know corn was used in making it."

Cowl said the National Corn Growers authorized Ford New Holland to use the official seal on its bags and that similar authority was granted by the American Soybean Association for the use of its "Soy Ink" seal, which will be used to inform the public when material is printed with soybean-based ink.

Ford New Holland is the first major farm equipment company authorized by the organizations to use their official seals. The company distributes more than

100,000 bags at North American farm shows annually. It is also currently exploring applications for soy ink in its corporate printing facilities.

"Farmers have always taken care of our food and fiber needs, but now they're using products to address other concerns, like what America is going to do with the nearly 160 million tons of garbage it produces each year," Cowl said. "Degradable plastic isn't the total answer, but it certainly will help."

Cowl said Ford New Holland will be working with the various commodity organizations to

explore ways in which it can help create a greater public awareness of what has been accomplished already in the search for new uses for farm products, plus what is on the horizon.

"An informed public can be very supporting, and we would like to help foster that type of climate," Cowl said.

Steven Wentworth, president of the National Corn Growers Association, said Ford New Holland's initiative to support new uses for farm products is definitely on track.

"The American farmer will be

in a position to do some remarkable things for this world in the years ahead, as long as we have the freedom and resources to make it happen," Wentworth said. "As always, public understanding of the farmer's role is crucial to our success. That's why we appreciate having companies like Ford New Holland come forward and help us tell our story."

Sander Ludeman, president elect of the American Soybean Development Foundation, was also very optimistic about future developments. "This exciting
