The efficiency experts of animal agriculture

# What % of your pigs end up like this?

## Two critical concerns of the newborn pig are TEMPERATURE and DRAFT.

- Below optimum room temperature results in increased death loss due to chilling.
- Common farrowing house fans can create sufficient air flow to effectively lower room temperature by 11° F.

### What needs to be done?

#### Maintain two temperature zones

- Newborn (by itself).....85-93°F
- Newborn (huddled with littermates)..... 75-93°F
- Lactating Sow ..... 60-70°F

(Pigtails - Series 2, Number 4)

## MoorMan's new ouchless feeder cuts waste, not your sows.

In other feeders, the design inhibits the sow's natural feeding motion. She doesn't get enough to eat—or too much, wasting as much as 38% of her feed and sometimes injuring herself.

Not so with the MoorMan's Sow Feeder.

MoorMan's and University of Illinois researchers studied how a sow eats and built a new feeder which matches her every movement—a design so painfully simple, it's painlessly easy for the sow to use.

The MoorMan's Sow Feeder protects your sow from harmful cuts, scrapes and punctures. No sharp edges to cut her. No jutting corners to gouge her. Everything rounded and smooth for safe, comfortable feeding.

MoorMan's Sow Feeder. Quick to install. Simple to fill. Tips out for easy cleaning.

With MoorMan's Sow Feeder, she simply raises her snout into a row of disks letting the proper amount of fresh feed flow into the feeding pan. She consumes only the amount she wants, safely and comfortably.

Get more from your sow by letting her get more from her feeder. Ask your nearest MoorMan's Representative about our new Sow Feeder.

And you'll see why MoorMan's continues to be the leader in animal agriculture.

## 19% of 1986 pig crop did not survive to weaning

(1988 Illinois FBFM)

### What are the causes of preweaning pig death?

|                       |       |
|-----------------------|-------|
| Born weak .....       | 14.9% |
| Crushing .....        | 30.1% |
| Chilling .....        | 5.3%  |
| Starvation .....      | 17.4% |
| TGE .....             | 4.4%  |
| Other diarrheas ..... | 12.7% |
| Pneumonia .....       | 1.3%  |
| Other .....           | 13.9% |

(Rodeffer, Leman..75 Farms - 22,267 Farrowings)
