## OVER 100 HOUSES SOLD IN THE PAST FOUR YEARS IN THE NORTHEAST!

### Chore-Time's ULTRAFLO® feeder for layers, pullets and breeders can free you from your chains

We have probably been too modest up to now about the merits of our new generation ULTRAFLO® cage feeder vs. the old style chain feeders some of our competitors are still trying to sell you. In fact, the only negative comments about our feeder come from our competition, not our customers. So we would like to point out the bare facts:

**FEED SAVINGS:** On-farm results show a feed savings of 1/2 lb. per 100 birds per day - over \$10,000 per year savings on a 100,000-bird house. Year after year.

**TROUBLE-FREE DESIGN:** Our feeder has only two moving parts - the one-piece auger plus each drive wheel; their chain has more. Our corners are heavy 12 ga. zinc plated tubing for long life; their corners have a reputation for trouble and short life.

**PROVEN DESIGN:** Over 10 million birds are already on our feeder worldwide. Also, it was proven in 5 years of on-farm testing before introduction.

**EASY ADAPTABILITY:** Ours adapts easily to existing cage systems you may already have. Or choose from our wide selection of cage styles.

**5-YEAR WARRANTY:** Ours gives you a 5-year warranty on auger and trough. Theirs doesn't. In fact, their dealers derive a large percentage of their income from parts sales. Ours don't.

**MICROPROCESSOR CONTROL:** Our control lets you program feeding time to the second, to match the exact time of one circuit. Control number of feedings, time of each feeding - also 10-second "Stimulation Cycles" between feedings, to minimize separation, and improve your birds' feed intake.

**SIMPLE OPERATION:** "Push-pull" Power Units with 1/2 or 1/4 HP motor are located in a cage, have hardened steel gears for trouble-free operation.

**HI-GRADING OF FEED:** Our auger travels at 80 FPM so birds are limited from eating until it stops; birds will hi-grade feed from chain feeders, causing uneven nutrition.

**REMIXING FEED:** Our auger slowly revolves, remixing old and new feed; theirs leaves most old feed to get stale.

**BILLED-OUT FEED:** Our auger acts as a grid to prevent birds from raking, piling, and throwing out feed; neither chain or disk systems prevent feed waste.

**COST SAVINGS:** Ours saves vast amounts of energy costs since it's easier to propel and runs only half as long as theirs.

**LOW MAINTENANCE:** With our 5-year warranty on auger and 20 ga. trough (one competitor has only 22 ga.) - plus no corner wheel mechanisms to wear out - ours saves you maintenance costs.
