

Armstrong Named President Of Jacques Seed

Curt Armstrong

PRESCOTT, Wis. — Jacques Seed Company today announced the appointment of Curt Armstrong as president.

Armstrong succeeds Tom Luehder, who assumes the full-time duties of vice president, operations, central group, for the Agrigenetics Company. Jacques Seed Company is an operating unit of Agrigenetics.

Armstrong previously held the position of vice president, operations for Jacques Seed Company and has been a part of the operations department for 15 years.

"Mr. Armstrong has the education and experience ideally suited to his new duties," said Luehder. "His experience encompasses field sales and operations as well as executive level management."

"His 25 years of experience in

the seed industry, coupled with his sensitivity and understanding of the needs of farmers, will serve him well in his new responsibilities. Over the past five years, he has been a member of the executive committee at Jacques and has been totally involved in all key decisions affecting the direction of the company."

Armstrong stated his seed business career in 1965 in Indiana with DeKalb. Prior to joining Jacques, he was employed by Trojan Seed Company.

He grew up on the family farm near New Richland, Minnesota, and holds a bachelor's degree in agriculture business administration from the University of

Minnesota.

"I look forward to the challenges of the next decade," said Armstrong. "Jacques Seed Company is poised for rapid growth. The products we've introduced in the last four years are being recognized by farmers as outstanding performers."

Pork Checkoff Programs Are Working

(Continued from Page D3)

checkoff funded Pork-The Other White Meat[®] advertising campaign is deceptive and misleading, subcommittee chairman Charles Stenholm (D-TX) noted that CSPI had declined to accept a written invitation extended last June by the National Pork Producers Council (NPPC) to provide CSPI

with all of the industry's background research on pork nutrition. The Council told CSPI at the time it was prepared "to answer any and all questions you have, show you our data, and even bring in outside nutrition research experts to show you the most recent and comprehensive analysis available."

Subcommittee chairman Stenholm suggested that if CSPI was truly interested in the matter it should "have found the time necessary to go to those individuals that you are going to criticize, unless it is your sole purpose to use this criticism for the purpose of fund-raising for your organization."

1990 BARN PAINTING Latest Developments

1. **PREPARATION** - High volume water blasting at 1,000 lb pressure re-surfaces barn siding into a smooth (like new) appearance!
 - a. Performed by professionals quickly at reasonable cost
 - b. By yourself with your own or rented equipment
 - c. Or other more conventional methods
2. **APPLICATION** - To insure better adherence to this super prepared surface, use the best fine bristle brush in four directions to evenly distribute the recommended mil thickness of seal coat coverage
3. **SPECIALIZATION** - Every barn is different but generally it's best to use a high quality mildew resistant product, specially formulated to meet the requirements of this partially weathered wood that was and will be weather stressed
4. **WARNING** The modified oil latex is less effective as a wood preserver and actually increases nail & metal deterioration Deal with home people At their rates, I could double mine.
