COMPARE THESE FEATURES AND OPTIONS
Simple hydraulics allows one valve to operate the lift and stabilizer cylinders. Center plumbing means less hose length and easier coupling.
The basic box is heavy-duty steel welded seams, and reinforced for even more strength.
Standard offset hitch adjusts in 5-inch steps to lengths from 63" to 7'11". To allow for different row crop spacings, you can offset either right or left 5, 7 1/2, 10 or 12 1/2 inches.
Rub rails offer more protection to vehicles when approaching, during dumping cycle, and when departing.
Stabilizer cylinders hydraulically lock on to axle to hold wagon rigid during dump cycle
Galvanized roof features vent insert for straight-through air flow

The model 700 dump wagon is designed for years of trouble free service. The hydraulic system with a cable assist is designed to unload large loads of up to 20,000 lbs. quickly and efficiently even if the load is not distributed evenly.

RICHARDTON

Make your operation safer • Use year round
• Variety of crops • All field conditions
• Operate in wet and muddy
