**PACMASTER THE NEW LEADER OF THE PACKS!**

- Remote start/stop control as standard equipment
  - Exclusive, new roughage auger with sharpened, hardened and curved auger knives, features 20 angle, 1/4" flighting, designed for more wear resistance and higher capacity
  - Exclusive drive design features non-slip double B-section banded V-belt to the blower for maximum efficiency, less whipping and no belt turnover
  - Big, 26" high-capacity impeller features 3/16" stainless steel paddles that have excellent durability and outstanding acid and abrasion resistance
  - Easier to raise The Pacmaster drive wheels are designed to roll freely after being disconnected for raising. Result No more dragging of wheels to raise position. They roll easily like they should.
- So, if you're thinking about buying a surface drive unloader, don't do anything until you talk to us about new Pacmaster™ - the leader of the Packs!

**BADGER'S AGRI SERVICE**

It's That Time Again, And We Are Here To Help You Get Your Harvestore® Ready For First Cutting With Quality Parts For Your Unloader  
 From **(S) Stahl Mfg., Inc.**

AND Lancaster Level-Flow Goosenecks To End Your Plugging Problems.

You can blow in as much as three tons of haylage a minute - over 100 feet up - with a new 12" center-fill Gooseneck from Lancaster Level-Flow. High profile and 33% larger diameter reduce friction to make plugging a thing of the past. And the Lancaster Level-Flow 12" gooseneck is fully enclosed to make sure your silage and haylage go into your silo - not on the roof.

SPECIALLY MADE FOR HARVESTORES®

**"Consider The Concrete Advantages"**

The best storage system for high moisture cob corn is a poured concrete SOLLENBERGER SILO, with bottom unloading. The feed can be safely stored at less than 30% moisture, air is effectively excluded limiting mold growth, the silo is equipped with a distributor to keep separation to a minimum which means more efficient unloading and consistent ration. The 6" solid concrete wall reflects heat meaning that heat damage is minimized and feed is kept cooler. Now is "Decision Time". Make Plans Now To Have Your Sollenberger Silo Erected In Time To Store Your High Moisture Ground Ear Corn.

SLANT BACK J BUNK H-BUNK

Let Us Know Your Needs. We Can Deliver From Our Large Inventory And Set On You: Prepared Site. OR: We Can Load On Your Truck To Help Save On Freight Costs. We Have Several Sizes And Styles To Choose From, Plus Metal Posts, For Cable, Which Can Be Bolted To The Bunk To Keep Cattle Out.

**MANURE STORAGE SYSTEMS**

- Manure Storage Systems For The Small Herd - or The 400 Cow Herds And Larger.
- Systems Adaptable To Any Type Equipment
- SCS Approved
- Circular Tanks Poured-In-Place Above Ground - In Ground - Or Uneven Backfill.
- Pre-Cast Concrete panels Delivered And Set On Your Prepared Site.

**CONSIDER THE ADVANTAGES OF HIGH MOISTURE EAR CORN**

Farmers who use ground shelled corn rather than ground ear corn when putting up high moisture corn (HMC) are not only leaving the cob in the field, but they are leaving at least \$150. worth of milk per acre of corn in the field.  
 These remarks were made by Dr. Howard Larson, noted Mid-Western dairy nutritionist and management specialist.  
 Further comments based upon years of research included:  
 \* Any amount of cob is better than none.  
 \* It is not economically feasible nor best for the cow to feed high moisture shelled corn.  
 \* It is not necessary to feed hay to dairy cows.  
 When cob is included with the grain, you not only get an extra 10 to 12 percent HMC by weight, but you get better digestibility in your cows. By adding the cob to the ration, you keep a floor of fiber under the total ration and fiber can supply a lot of energy; and you get better rumen action.

**PRE-CAST BUNKER SILOS "THE ECONOMICAL CHOICE" STORAGE FOR ANY FORAGE**

Also Suitable For Grain Storage, And Practically Any Other Bulk Material.  
 The Sollenberger Pre-Cast Bunker Silo Panel Is Designed To Be Free-Standing. With The Tongue and Groove Edges. It Can Be Coated With Mastic & Bolted Together To Give An Air-Tight Smooth Wall That's Easy To Pack And "Keeps Feed Good." Delivered And Set On Your Prepared Gravel Base.
