**Lancaster BELT FEEDER AND "NEW" Lancaster CONVEYOR.** Modern dairy and beef feedlots can be automated with the use of bunk feeders using 'belt feeder' units. Corn silage, haylage, high moisture corn and other feed material can be distributed quietly evenly and with no separation. A traveling plow unit places the feed directly to the center of the bunk trough. Simple operation and very low horsepower requirements make this Lancaster belt feeder popular with dairy and beef operators. Rubber belt and wooden trough design—keeps silage from contacting or corroding metal.
