

# “WE ELIMINATED NEARLY 14,000 POUNDS OF FLUID AND STILL GOT GREAT TRACTION.”

Bob Kuehl  
Glyndon, Minnesota

Bob Kuehl is a row crop farmer in Glyndon, Minnesota. In order to get enough traction from his tractor during plowing, Bob had to add nearly 14,000 pounds of fluid to his bias ply tires. He got better traction, but the added weight increased his fuel consumption, and the time Bob had to spend in the field.

Luckily, his Goodyear retailer suggested that Bob switch one tractor from bias ply tires to Goodyear Dyna Torque farm radials.

That's all it took. Bob was able to eliminate

excess fluid and get all of the traction he needed. He was so satisfied with the results, that all of his tractors now do tilling, planting, watering, spraying and harvesting on Goodyear Dyna Torque Radials.

Make

your move to Goodyear farm radials. You'll spend less time in the field at lower overall costs than on bias ply rears. Contact your Goodyear farm tire retailer, today.
