Whether You Milk In A Parlor Or A Stanchion Barn

# Good to the Last Drop!

No matter what kind of dairy farm you run, when you invest in Westfalia products, **you get more milk for your dollar.** And more milk production out of your cows adds up to more profits for you. Westfalia's computerized management system and complete line of high-tech dairying products bring the latest advancements in dairying technology right into your milking system. Just look at some of our products:

**Metatron Milk Meter**  
 Westfalia's vacuum-operated Metatron milk meter helps you manage your entire herd more economically by individually monitoring production from each one of your dairy cows at each milking.

**Automatic Cluster Removal (ACR)**  
 The flow monitor detects when milk flow ceases on each cow and shuts off the vacuum. This allows for precise, gentle cluster removal — automatically.

**Computerized Feeding**  
 The Dairy Plan even links and integrates the Metatron to our computerized feed system to monitor and control your individual cow's feed rations according to her production requirements.

**Optional Stimulation/Pulsaton**  
 Combine pre-milking stimulation with Westfalia's Metatron or ACR. Look to our modern, electronic pulsation device, the **Stimopuls**, for complete milk let down every time!

**Milking Parlors Designed for Profit**  
 Revolutionize your dairy operation with a high-tech Herringbone parlor from Westfalia. The "45" Squeeze Front parlor has an air-operated indexing breast rail to accommodate different sized cows and gently guide them into milking position. Choose the **Westfalia/Kipe Side By Side Milking Parlor**. Features include auto-sequential loading, a unique restraint system for different sized cows and compact 29" spacing. Only one step is required from cow to cow, so you can milk faster and more efficiently **lower your costs!**

If you demand the highest possible return from your investment in new dairy equipment, take a look at Westfalia's complete line of dairy management products. They always help you get that last drop!
