## N.E. Chicken Parts

August 8, 1990

Trucklot buying interest was mixed and selective. Supplies and offerings of skinless boneless breasts were uneven, but generally lighter and held with increased confidence. Whole breasts were short of an active call. Legs and thighs were adequate to fully adequate, while leg quarters were adequate. Drums were noted difficult to fill at some points. Wings remained in excess with limited trading noted as low as 55 cents to stimulate clearances.
