Junior 2-year-olds, Keith Kennedy; senior 3-year-olds, Eric Stine, first; and James Byler, second. Three-year-olds, James Byler.

Four-year-olds, John Foster III, first; Kristen Metzker, second and Joe Stitt take a third. In dry cows, James Byler had first and Keith Kennedy, second; and John Foster III, third.

The grand champion fitter award went to Joe Stitt of Blair County. Stitt admits to being an expert trimmer who at times, gives lessons.

Grand Champion Showman was Brian Kaufman of Somerset County. "It's not difficult to teach a cow to lead," he says modestly. "You walk them once a day from the time they are about 8-weeks-old."

Judges for the show were Ginger Myers of Littlestown and Tom Wakefield, Bedford, was the Fitting and Showing Judge.

"I couldn't say anything against any entry in this show," Wakefield commented, "They all did a marvelous job."

Senior champions in the Morrison Cove FFA Dairy Show are, from left, Robert Fritz, Eric Stine, Galen McDonald, David Jenkins, and Christiana Booth.

Junior champs at the Morrison Cove FFA Dairy Show are, from left, John Foster II, Brandon Snider, Joy Clapper, Christiana Booth and Robert Fritz Jr.

There's a new breakthrough seed treatment for small grains.

BAYTAN 30 FUNGICIDE

Powerful, broad-spectrum protection against powdery mildew, rusts and smuts.

No other seed treatment can deliver more protection against major small grain diseases than new BAYTAN 30.

It's EPA cleared for use on wheat, barley, oats and rye, and university test plots over the past few years have proven that, where disease pressure is moderate to heavy, BAYTAN 30 will consistently produce an exceptional return on investment.

Since BAYTAN 30 is systemic, it is absorbed right into the plant's system, effectively controlling or suppressing seedborne and soilborne diseases for several weeks. Researchers from some production areas have reported that BAYTAN 30 will also effectively suppress take-all.

BAYTAN 30 also provides early season protection against the establishment of foliar diseases such as powdery mildew, leaf and stripe rust, and can be used in conjunction with your foliar fungicide program.

This exciting new seed treatment will be available only on seed sold through certified seed conditioners. So, for more information on BAYTAN 30 and the locations of certified seed conditioners near you, please contact the Gustafson office in Dallas, (214) 985-8877.

When you're up against moderate to heavy disease pressure, there isn't a better answer than new BAYTAN 30 Systemic Seed Treatment from Gustafson.

Powdery Mildew

Smut

Crop Field Days

LANCASTER (Lancaster Co.) — Two crop management field days will be held on Tuesday, August 28, 1990.

The morning program will start at 9:30 a.m. at the farm of Edward Zug, located on Peters Creek Road in Fulton Township, Lancaster County. The program will include the use of the Penn State soil nitrogen quick test, reducing the use of agricultural pesticides with integrated pest management, manure storage and handling for environmental protection, manure spreader calibration, and funding opportunities for conservation practice installation. The morning program will end around 11:30 a.m.

The program will be repeated in the afternoon at the Martin Greenleaf Jr. farm in Colerain Township, Lancaster County, starting at 1 p.m. The program at the Greenleaf farm will include stream crossings for livestock. The afternoon program will end around 3 p.m.

Both programs will qualify for update training credits under the Pennsylvania Pesticide Certification Program. All interested persons are invited to attend.

To get to the Zug farm, take Route 272 south, at Black Bear Structures, turn right on Pilgrims Road, then left on Peters Creek Road. The farm will be on the left. To get to the Greenleaf farm, take the Kirkwood Pike, Route 272, south. Approximately 2-3/4 miles south of Kirkwood, turn right on Mount Eden Road. The farm is on the left. Rain dates are not scheduled for the event.
