COMPARED TO LAST WEEK: NO  
SALES CONFIRMED ON CARLOT  
SPRING LAMB.

**PLANT MORE MILK.**

More milk per acre means more profit per acre, and W-L Alfalfas have proven their advantage - in milk and in dollars.

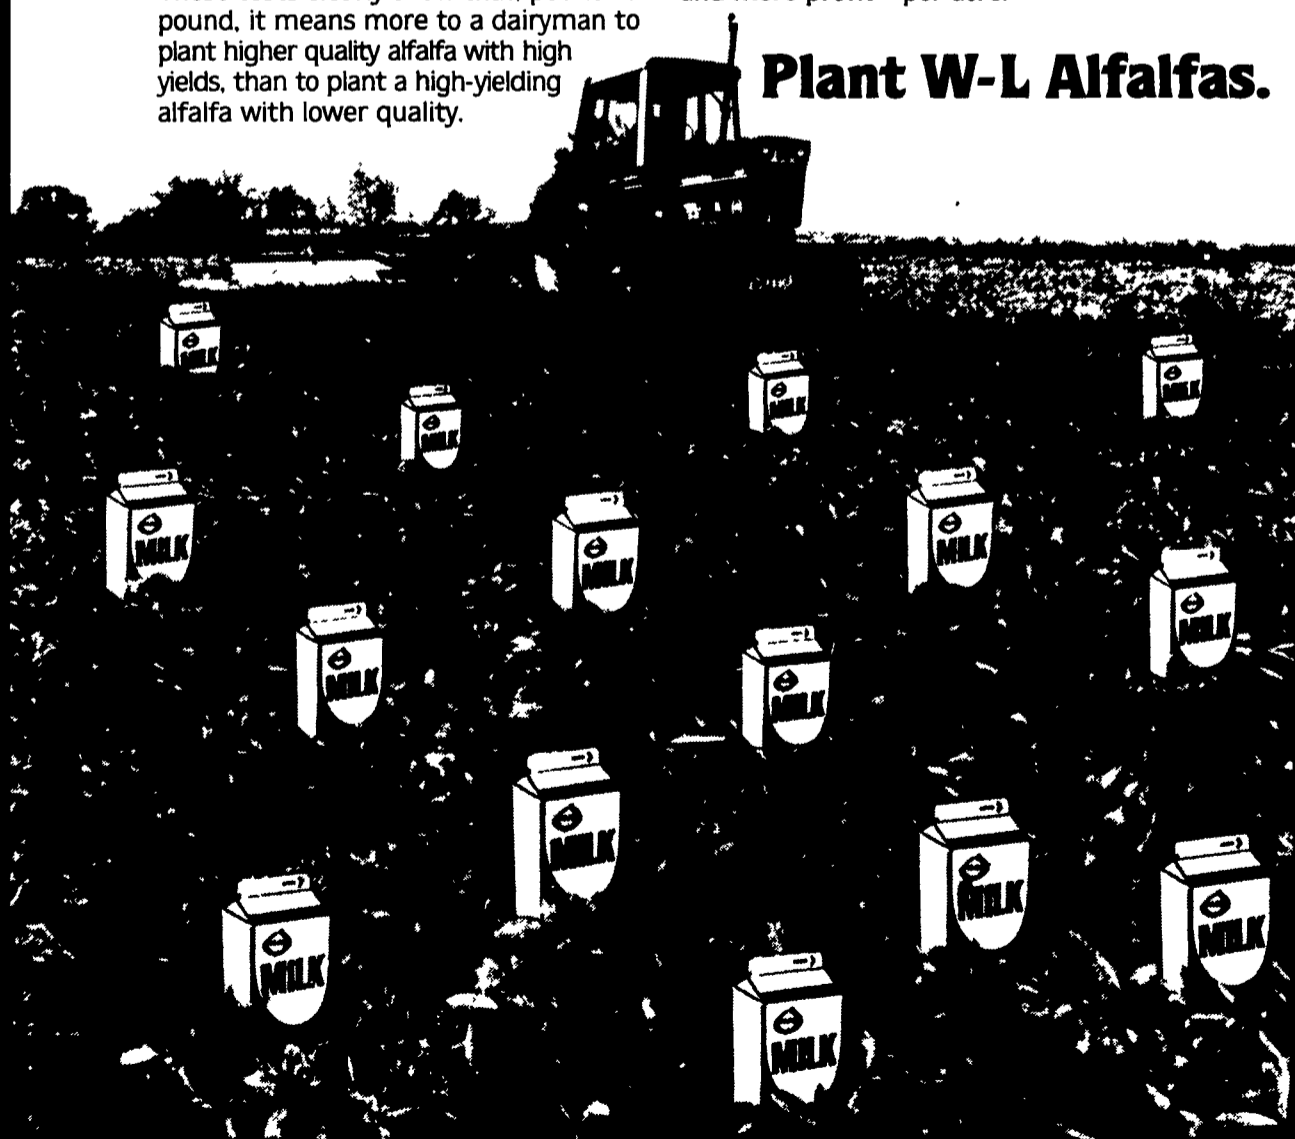

For example, WL317 produced 148 pounds of milk per acre over the top competitors in recent tests conducted by W-L Research. The results were derived from a program that calculates milk production based of forage quality. These tests clearly show that, pound for pound, it means more to a dairyman to plant higher quality alfalfa with high yields, than to plant a high-yielding alfalfa with lower quality.

The potential dollars per acre advantage using W-L Alfalfa came in at \$92 greater milk yield per acre over the top competing varieties. And, that milk per acre value advantage with W-L Alfalfa adds up to greater profitability.

Time after time, top producers have selected W-L Alfalfa varieties that reward them with high quality, low cost feed.

It all adds up to more milk - and more profit - per acre.

**Plant W-L Alfalfas.**
